

Books

159252	<p>ACUTE PHASE PROTEINS: Molecular Biology, Biochemistry, and Clinical Applications Andrzej Mackiewicz, Irving Kushner, Heinz Baumann (Eds.), CRC Press, Boca Raton, FL, 1993, 720 pages. This book covers all major aspects of acute phase proteins starting with molecular mechanisms regulating their synthesis and ending with their functional significance. ISBN 0-8493-6913-4</p>	1 each	306.75
194285	<p>ADVANCED ORGANIC CHEMISTRY, Part B: Reactions and Synthesis Carey, F.A. and Sundberg, R.J. (Eds.), Plenum Press, New York, NY, 1990, 800 pages, soft bound. The second of a two part set that describes organic chemistry principles and reactions. ISBN 0-306-43457-1</p>	1 each	35.80
194270	<p>THE ADHESION MOLECULE: Factsbook Pigott, R. and Power, C. (Eds.), Academic Press, San Diego, CA, 1993, 190 pages, soft bound. This book provides current information on all cloned and characterized cell adhesion molecules to date. Additionally, it discusses gene organization, amino acid sequences, physicochemical properties, and biological activity. ISBN 0-12-555180-0</p>	1 each	63.00
194370	<p>ADVANCES IN LIPID METHODOLOGY-One Christie, W.W. (Ed.), The Oily Press, Ayr, Scotland, 1992, 369 pages, hard bound. The first of a two part series presenting general lipid principles and modern methodologies. ISBN 0-9514171-1-8</p>	1 each	73.10
198794	<p>ADHESION PROTEINS PROTOCOLS Dejana, Elisabetta (Ed.), Humana Press, Totowa, NJ, 1998, 177 pages, hard bound. An international corps of expert investigators describe their optimized techniques for both the identification of new cell adhesion proteins and for the characterization of novel adhesive structures. ISBN 0-89603-417-8</p>	1 each	72.95
194370	<p>ADVANCES IN LIPID METHODOLOGY-Two Christie, W.W. (Ed.), The Oily Press, Ayr, Scotland, 1993, 335 pages, hard bound. The second of a two part series describing the current techniques in lipid research. Among the topics covered are high resolution ¹³C NMR spectroscopy and the preparation of ester derivatives of fatty acids for chromatographic analysis. Also, it comprises topical reviews by international experts on lipid methodology. ISBN 0-9514171-3-4</p>	1 each	80.00
194348	<p>ADVANCED ORGANIC CHEMISTRY, Part A: Structure and Mechanisms Carey, F.A. and Sundberg, R.J. (Eds.), Plenum Press, New York, NY, 1990, 802 pages, soft bound. The first part of a set that describes the fundamentals of organic compound structure and organic chemical reaction mechanisms. It provides an in depth understanding of organic chemistry and is well suited for use as a textbook and general reference. ISBN 0-306-43447-4</p>	1 each	35.80
198832	<p>AFFINITY BIOSENSORS Rogers, Kim and Mulchandani, Ashok (Eds.), Human Press, Totowa Press, 1998, 264 pages, hard bound. A cutting-edge collection of detailed, step-by-step techniques and protocols for constructing, evaluating and using affinity-based biosensors. ISBN 0-89603-539-5</p>	1 each	95.00

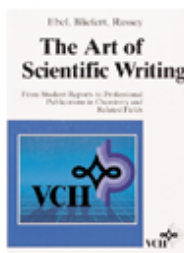

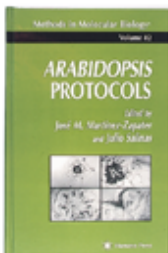

Books

194382	AFFINITY CHROMATOGRAPHY: A Practical Approach Dean, P.D.G., Johnson, W.S. and Middle, F.A. (Eds.), IRL Press at Oxford University Press, Oxford, England, 1985, 215 pages, soft bound. A comprehensive reference to affinity chromatography purification and separation techniques of molecules and cells. It provides some common modern methods performed by experts in the field, it discusses various available matrices, and describes the coupling and activation of these matrices to spacers. ISBN 0-904147-71-1	1 each	47.25	159305	ANIMAL CELL CULTURE, 2nd Edition: A Practical Approach R.I. Freshney (Ed.), Oxford University Press, Oxford, UK, 1992, 352 pages, soft bound. This new, thoroughly updated edition details the recent progress made in this field. ISBN 0-19-963213-8	1 each	52.00
198665	ANALYTICAL CHEMISTRY FOR TECHNICIANS, 2nd Edition Kenkel, J., Lewis Publishers, Boca Raton, FL, 1994, 541 pages, comb bound. This text contains a mixture of chemical theory and practice to meet the requirements of technicians and instructors. ISBN 0-87-371966-2	1 each	83.95	158400 RT	ANIMAL VIRUS PATHOGENESIS: A Practical Approach Michael B.A. Oldstone, Editor, IRL Press at Oxford University Press, Oxford, UK, 1990, 174 pages, soft bound. This volume provides practical guidance for assaying viral tropism, expression, and infectivity, as well as methods for identifying antiviral cytotoxic T-cells, natural killer cells, and antibody responses. The final chapters cover the latest techniques for raising antipeptide antibodies and making vaccinia/viral cDNA for immunologic target recognition. ISBN 0-19-963101-8	1 each	48.35
159329	ANCIENT DNA B. Herrmann and S. Hummel (Eds.), Springer-Verlag, Secaucus, NJ, 1993, 250 pages, soft bound. This book contains contributions from many of the first generation researchers who pioneered the development and application of ancient DNA methods. ISBN 0-387-94308-0	1 each	60.65	198599	ANTIBODY ENGINEERING PROTOCOLS Paul, S.(Ed.), Humana Press, Totowa, NJ, 1995, 451 pages, comb bound. This collection of newly developed techniques for producing antibody reagents by immunization and recombinant DNA techniques contains easy-to-use protocols that highlight new areas of research on antibody structure, function and application. ISBN 0-89603-275-2	1 each	72.95
194211	ANIMAL CELL CULTURE Morgan, S.J. and Darling, D.C. (Eds.), Bios Scientific Publications, Oxford, England, 1993, 176 pages, soft bound. A comprehensive introduction to current techniques performed in animal cell culture. It describes the details of each method, as well as, applications in modern cell and molecular biology. It is excellent for all individuals involved in or just beginning in the field of cell culture. ISBN 1-872748-16-3	1 each	44.05	194218	ANTIBODY TECHNOLOGY Liddell, J.E. and Weeks, I. (Eds.), Bios Scientific Publications, Oxford, England, 1995, 160 pages, soft bound. Any new comer to the field will find this to be an excellent book providing general knowledge on polyclonal, monoclonal, chimeric, and human antibody production and their many applications. ISBN 1-872748-87-2	1 each	44.05

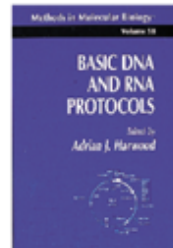

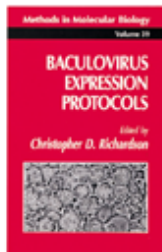

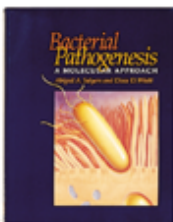

Books

198600	ANTISENSE THERAPEUTICS Agrawal, S. (Ed.), Humana Press, Totowa, NJ, 1996, 304 pages, hard bound. This volume explores current research on anti-viral drugs, cancer treatments and therapies for genetic disorders. Contributors review selection of gene targets, synthesis of oligonucleotides, routes of administration and issues of pharmacokinetics. ISBN 0-89-603305-8	1 each	131.25	194420	THE ART OF SCIENTIFIC WRITING Ebel, H.F., Bliedert, C. and Russey, W.E. (Eds.), VCH Publishers, Inc., New York, NY, 1987, 493 pages, soft bound. A reference describing proper writing techniques in science. It covers taking notes, style, and problems encountered in the preparation of a manuscript. It is ideal for any individual just beginning to prepare text. ISBN 3-52726-469-8	1 each	50.40
194265	APOPTOSIS II Tomei, L.D. and Cope, F.O. (Eds.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1994, 430 pages, soft bound. Currently, apoptosis is one of the leading areas of intense research in numerous disciplines including cancer research, virology, immunology, neuroscience, and aging research. This book provides information from a new collection of articles describing the genetic controls of apoptosis and its regulation in normal and neoplastic cells of many types.	1 each	71.65	198601	ASM POCKET GUIDE TO CLINICAL MICROBIOLOGY Murray, P.R., American Society of Microbiology, Washington, DC, 1996, 274 pages, soft bound. This is a handy reference containing essential information for the clinical microbiologist. Topics include differential identification, specimen collecting, transport and processing, susceptibility testing and immunodiagnostic tests. ISBN 1-555-81-109-4	1 each	28.30
198863	ARABIDOPSIS PROTOCOLS Martinez-Zapater, Jose M. and Jalinias, Julio (Eds.), Humana Press, Totowa, NJ, 1997, 472 pages, case bound. Internationally recognized experts offer a comprehensive collection of significant new methods for gene mapping, cloning, and reverse genetics, as well as updated standard protocols for work with Arabidopsis genetics and molecular biology. Theses time-tested methods range from techniques for the successful growing of Arabidopsis to strategies for gene cloning. ISBN 0-89603-391-0	1 each	83.45	194223	AUTORADIOGRAPHY: A Comprehensive Overview Baker, J.R.J. (Ed.), Bios Scientific Publications, Oxford, England, 1989, 116 pages, soft bound. This book introduces the reader to the theory and techniques of autoradiography. It serves as a useful guide for selecting the correct approach for a particular application. ISBN 0-19-856422-8	1 each	33.00
				194264	AUTORADIOGRAPHY AND CORRELATIVE IMAGING Stumpf, W.E. and Solomon, H.F. (Eds.), Academic Press, San Diego, CA, 1995, 588 pages, hard bound. This book functions as an introduction and guide to autoradiography. It serves as a primary source on using radiochemicals to localize and identify molecules in cell culture, to characterize receptors with labeled ligands, and to measure gene expression. Also included in this text is protocol and background information. ISBN 0-12-675450-0	1 each	120.75

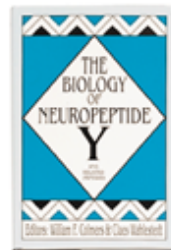

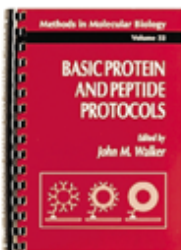

Books

159255	BACTERIAL ENDOTOXIC LIPOPOLYSACCHARIDES, Vol. I: Molecular Biochemistry and Cellular Biology David C. Morrison and John L. Ryan, CRC Press, Boca Raton, FL, 1992, 480 pages. This two volume set provides an up-to-date of bacterial lipopolysaccharide structure and activities. Volume I includes biochemistry and cell biology of endotoxins. ISBN 0-8493-6787-5	1 each	239.60
159256	BACTERIAL ENDOTOXIC LIPOPOLYSACCHARIDES, Vol. II: Immunopharmacology and Pathophysiology David C. Morrison and John L. Ryan, CRC Press, Boca Raton, FL, 1992, 480 pages. This two volume set provides updated information concerning bacterial lipopolysaccharide structure and activities. Volume II includes pharmacology and immunopathophysiology of endotoxins. ISBN 0-8493-6788-3	1 each	239.60
159478	BACTERIAL PATHOGENESIS: A Molecular Approach Abigail A. Salyers and Dixie D. Whitt (Eds.), ASM Press, Washington, D.C., 1994, 418 pages, soft bound. This book provides a comprehensive introduction into the fundamentals and applications of molecular techniques used to study the bacterium-host interactions involved with infectious diseases. ISBN 1-55581-070-5	1 each	52.00
194424	BACULOVIRUS EXPRESSION PROTOCOLS: Methods in Molecular Biology, Vol. 39 Richardson, C.D. (Ed.), Humana Press, Totowa, NJ, 1995, 420 pages, comb bound. A collection of laboratory methods for protein expression involving Baculovirus systems. It features a up-to-date list of expression vectors and detailed steps for scale-up operations to spinner flasks, bioreactors, and insect larvae. ISBN 0-89603-272-8	1 each	71.10
159379	BACULOVIRUS EXPRESSION VECTORS David R. O'Reilly, Lois K. Miller, and Verne A. Luckow, Oxford University Press, Oxford, UK, 1992, 347 pages, comb bound. This laboratory manual is designed to help both beginning and experienced researchers construct and use baculovirus expression vectors. ISBN 0-19-50913-10	1 each	63.70
194365	BAILEY AND SCOTT'S DIAGNOSTIC MICROBIOLOGY, 9th Edition Baron, E., Peterson, L., and Finegold, S. (Eds.), Mosby YearBook, St. Louis, MO, 1994, 958 pages, hard bound. This book describes infection control and covers current medical microbiology detection methods and techniques. ISBN 0-8016-6987-1	1 each	81.90
194262	BASIC CELL CULTURE: A Practical Approach Davis, J.M. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1994, 301 pages, soft bound. This book details the establishment of a cell culture laboratory, the sterilization of reagents and equipment, the use of culture media, culture techniques, cell line maintenance, primary cell culture and isolating new cell lines, cell types and their needs, single cell cloning, and the quality control and prevention, detection, and curing of contamination of cell lines.	1 each	52.90
198602	BASIC DNA AND RNA PROTOCOLS Harwood, A.J.(Ed.), Humana Press, Totowa, NJ, 1996, 514 pages, comb bound. This volume contains a key collection of the latest molecular and genetic techniques for cloning, sub-cloning, sequencing and PCR and protein expression. In addition, there are advanced techniques that indicate future progress in non-isotopic DNA labeling, silver staining and automatic sequencing. ISBN 0-8960330-331-7	1 each	72.95

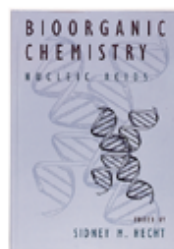

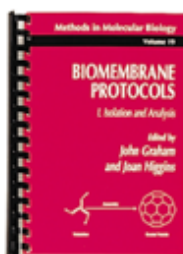

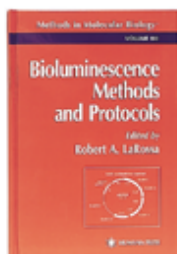

Books

194470	BASIC LABORATORY AND INDUSTRIAL CHEMICALS: A CRC Quick Reference Handbook Lide, D.R. (Ed.), CRC Press, Boca Raton, FL, 1993, 370 pages, soft bound. A valuable reference on 1,000 high profile chemical substances commonly used in the lab. Some information presented includes physical, thermodynamic, and transport chemical properties. ISBN 0-8493-4498-0	1 each	64.95
194362	BERGEY'S MANUAL OF DETERMINATIVE BACTERIOLOGY, 9th Edition Holt, J.G. (Ed.), Williams and Wilkins, Baltimore, MD, 1993, 500 pages. Based on Bergey's Manual of Systematic Bacteriology, this text contains updated information on new genera and species. ISBN 0-683-00603-7	1 each	68.25
194468	BASIC METHODS IN MOLECULAR BIOLOGY, 2nd Edition Davis, L.G., Kuehl, W.M. and Battey, J.F. (Eds.), Appleton and Lange, Norwalk, CT, 1994, 792 pages, spiral bound. An updated edition providing a broad spectrum of modern methods. It presents comparisons on the advantages and disadvantages of various techniques. Also, it offers helpful trouble-shooting tips. ISBN 0-8385-0642-9	1 each	95.00
194257	BIOACTIVE NATURAL PRODUCTS Steven M. Colegate and Russell J. Molyneux (Eds.), CRC Press, Boca Raton, FL, 1993, 608 pages. An internationally selected group of experts share their knowledge of a wide range of bioactivities and chemical compound classes. ISBN 0-8493-4372-0	1 each	209.45
194219	BASIC PHOTOMICROGRAPHY Bracegirdle, B. and Bradbury, S. (Eds.), Bios Scientific Publications, Oxford, England, 1995, 112 pages, soft bound. A completely new guide to photomicrography. It contains a plethora of advice on selecting equipment, correct performance techniques, and obtaining the best results. ISBN 1-85996-090-1	1 each	40.75
194256	BIOCHEMICAL TECHNIQUES: Theory and Practice Robyt, J.F. and White, B.J. (Eds.), Waveland Press, Prospect Heights, IL, 1987, 407 pages, hard bound. This volume provides information on the fundamental theories and applications used in biochemistry and in biochemical research. ISBN 0-88133-556-8	1 each	34.10
158846	BASIC PROTEIN AND PEPTIDE PROTOCOLS: Methods in Molecular Biology, Vol. 32 John M. Walker, Ed., Humana Press, Totowa, NJ, 1994, 512 pp., comb bound. A revision of the book "Proteins" (1984), Basic Protein and Peptide Protocols which adds new lab methods for protein and peptide analysis. Every protocol features tips on troubleshooting, procedures, detailed explanations, and lists of reagents and suppliers. ISBN 0-89603-269-8.	1 each	82.95
194466	BIOCHEMISTRY, 4th Edition Stryer, L. (Ed.), W.H. Freeman and Co., New York, NY, 1995, 1,064 pages, hard bound. This current edition features a challenging reevaluation of this field by an active researcher and teacher. The book emphasizes the dramatic advances in recombinant DNA technology, X-ray crystallography, and analysis and reconstitution. This text offers the most current and broad information in this field to date. ISBN 0-7167-2009-4	1 each	93.45

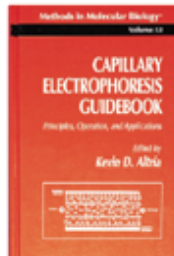

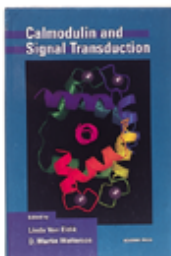

Books

198641	BIOENERGETICS: A Practical Approach Brown, G.C. and Cooper, C.E. (Eds.), IRL Press at Oxford University Press, Oxford, UK, Hard Bound. Understanding the passage of protons, electrons and other ions across and through membranes is critical in the fields of energy transduction, cell biology and cell signaling. This volume details the key methods and approaches of bioenergetics. ISBN 0-19-963488-2	1 each	57.75	THE BIOLOGY OF NEUROPEPTIDE Y William F. Colmers and Claes Wahlestedt (Eds.), Humana Press, Totowa, NJ, 1993, 512 pages. Twelve review articles by leading experts critically summarize the state of knowledge concerning molecular, physiological, and behavioral aspects of NPY and its cogeners. ISBN 0-89603-241-8	1 each	115.15
194421	BIOLOGICAL DATA ANALYSIS: A Practical Approach Fry, J.C. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1993, 418 pages, soft bound. A practical guide for strategy planning and result interpretation of the various statistical approaches and problem models available. It discusses methods of data analysis without making errors that may invalidate results. ISBN 0-19-963339-8	1 each	68.25	THE BIOLOGY OF NONSPECIFIC DNA-PROTEIN INTERACTIONS Arnold Revzin (Ed.), CRC Press, Boca Raton, FL, 1990, 264 pages. This important publication addresses the interactions of proteins with non-specific sites on DNA. ISBN 0-8493-6177-X	1 each	179.45
198603	BIOLOGICALLY ACTIVE PEPTIDES: Design, Synthesis and Utilization Williams, W.V. and Weiner, D.B., (Eds.), Technomic, Lancaster, PA, 1992, 360 pages, hard bound. This volume explores basic and advanced peptide design, synthesis, evaluation and utilization. New therapeutic approaches from experimental systems are discussed. ISBN 0-877-62935-8	1 each	94.45	BIOLOGY OF PLASMIDS Summers, D.K., Blackwell Science, Cambridge, MA, 1996, 160 pages, soft bound. This text discusses plasmids, their biology and evolutionary history and their use in molecular biology as tools and model systems.	1 each	33.00
194252	BIOLOGY, 3rd Edition Raven, P.H. and Johnson, G.B. (Eds.), Mosby-Year Book, Inc., St. Louis, MO, 1992, 1,299 pages, hard bound. This edition is divided into eleven parts, each discussing specific information. Included in this book are numerous color photographs and graphics. ISBN 0-8016-6372	1 each	62.80	BIOOLUMINESCENCE METHODS AND PROTOCOLS LaRossa, Robert A. (Ed.), Humana Press, Totowa, NJ, 1998, 306 pages, case bound. A state-of-the-art collection of innovative methods for the use of luciferase and green fluorescent protein in analytical biochemistry, molecular toxicology, environmental monitoring and cell-based assays. ISBN 0-89603-520-4	1 each	93.95

Books

159343	<p>BIOMEMBRANE PROTOCOLS I: Isolation, and Analysis Methods in Molecular Biology, Vol. 19 John M. Graham and Joan A. Higgins (Eds.), Humana Press, Totowa, NJ, 1993, 313 pages, comb bound. This is volume I of the two volume set concerning biomembrane protocols. It covers the isolation and compositional analysis of membranes. ISBN 0-89603-236-1</p>	1 each	80.45	198705	<p>BRETHERICK'S HANDBOOK OF REACTIVE CHEMICAL HAZARDS, 5th Edition Bretherick, L., Urben, P., Butterworth and Co. (Publishers and Editors) Ltd., London, UK, 1995, two volumes, 2100 pages, hard bound. This source contains information on chemical hazards for 4,800 compounds and elements, plus 5,000 entries containing two or more chemicals. Literature references are provided through January 1994.</p>	1 each	236.25
159344	<p>BIOMEMBRANE PROTOCOLS II: Architecture and Function Methods in Molecular Biology, Vol. 27 John Graham and Joan Higgins (Eds.), Humana Press, Totowa, NJ, 1994, 362 pages, comb bound. This is the second volume in the two volume set on biomembrane protocols. It covers molecular topology, the dynamic aspects of membrane structure and ion transport. ISBN 0-89603-250-7</p>	1 each	68.80	198851	<p>CALMODULIN AND SIGNAL TRANSDUCTION Van Eldik, Linda and Watterson, D. Martin (Eds.), Academic Press, San Diego, 1998, case bound. This book focuses on emerging themes in the molecular mechanisms of calcium signal transduction through calmodulin-regulated pathways. It provides the reader with selected examples and experimental precedents that use current models of cell regulation through calmodulin-regulated pathways and their linkage with other regulatory pathways. ISBN 0127138609</p>	1 each	120.75
198642	<p>BIORGANIC CHEMISTRY: Nucleic Acids Hecht, S.M. (Ed.), Oxford University Press, Oxford, UK, 1996, 500 pages, hard bound. This volume concentrates on nucleic acids from an organic chemistry perspective. Highlighted are important insights into biology at the molecular level ranging from the structure and function of DNA and RNA to chemical and enzymatic synthesis to alternate structures and structures of macromolecular complexes. ISBN 0-19-508467-5</p>	1 each	62.95	158392	<p>CANCER, HIV AND AIDS Cancer Surveys, Vol. 10 Valerie Beral, Harold Jaffe and Robin Weiss, Editors, CSHL Press, Cold Spring Harbor, 1991, 168 Pages, hard bound. Topics include: Epidemiology, etiology, and clinical management of Kaposi's Sarcoma; HIV associated non-Hodgkin lymphoma, ; surgical pathology of HIV associated lymphoproliferations; HIV infection and cancers other than non-Hodgkin lymphoma and Kaposi's sarcoma. ISBN 0-87969-362-2</p>	1 each	84.45
194374	<p>BIOTECHNOLOGY FROM A TO Z Bains, W. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1993, 358 pages, soft bound. A valuable reference that simplifies biotechnology terminology providing more than 1,000 definitions in 250 entries. Written for use as a easy reference guide for the researcher and the non-specialist. ISBN 0-19-963334-7</p>	1 each	25.35	159367	<p>CAPILLARY ELECTROPHORESIS: Principles and Practice R. Kuhn and S. Hoffstetter-Kuhn, Springer Laboratory, NY 1993, 375 pages, hard bound. This book is intended to be a practical guide for beginners in capillary electrophoresis as well as for those researchers with some experience in this field. ISBN 0-387-56434-9</p>	1 each	95.00

One call. One source.
 A world of biomedical products.
