

Books

198864	<p>CYTOKINE KNOCKOUTS Durum, Scott K. and Muegge, Kathrin (Eds.), Humana Press, Totowa, NJ, 1997, 512 pages, case bound. This book is a unique compendium of the latest information on cytokine knockouts. Each chapter-written by the leading scientists who created or studied each knockout-illuminates the physiological consequences of deficiency in a particular cytokine and relates the phenotype to other knockout mice and to human diseases. ISBN 0-89603-368-6</p>	1 each	131.25	158838	<p>THE CYTOSKELETON: A Practical Approach Carraway, K.L., Carraway, C.A.C., Ed. IRL Press at Oxford University Press, New York, NY, 1992, 288 pages; 35 illustrations, soft bound. This book features an array of applications, techniques, and expertise for the investigation of the three main systems-microfilaments, intermediate filaments, and microtubules- comprising the cytoskeleton of eukaryotic cells. ISBN 0-19-963256-1</p>	1 each	62.00
194212	<p>CYTOKINES Clemens, M.J. (Ed.), Bios Scientific Publications, Oxford, England, 1991, 132 pages, soft bound. This book provides a brief synopsis on the definition, roles, and performance of cytokines at the cellular level. Additionally, it defines their relationships pertaining to health and disease states and their significance in clinical applications. ISBN 1-872748-70-8</p>	1 each	48.00	194484	<p>DIAGNOSTIC BACTERIOLOGY PROTOCOLS: Methods in Molecular Biology, Vol. 46 Howard, J. and Whitcombe, D.M. (Eds.), Humana Press, Totowa, NJ, 280 pages, comb bound. A collection of a broad spectrum of modern protocols necessary for medical, industrial and academic labs. Some topics include trouble-shooting tips and step-by-step procedures for accurate and reproducible results. ISBN 0-89603-297-3</p>	1 each	86.00
198645	<p>CYTOKINES: A Practical Approach, 2nd Edition Balkwill, F.R. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1995, 417 pages, soft bound. This updated edition contains current methods for the study of cytokines, their receptors and cytokine-driven processes. There is a complete guide to the cloning, identification, characterization and assaying of cytokines. Several new procedures are included: development of cytokine transgenic and knockout mice, measurement of soluble cytokine receptors and assays for newer cytokines. ISBN 0-19-963566-8</p>	1 each	57.75	198611	<p>DIAGNOSTIC MOLECULAR MICROBIOLOGY: Principles and Applications Perching, D.H., et al.(Eds.), American Society for Microbiology, Washington, DC, 1993, 664 pages, soft bound. This text reviews DNA techniques in the microbiology laboratory. 60 protocols detail the newest techniques for identification of pathogens. ISBN 1-55581-056-X</p>	1 each	68.25
159308	<p>CYTOKINES AND CYTOKINE RECEPTORS, In Focus Ann S. Hamblin, Oxford University Press, Oxford, UK, 96 pages, soft bound. This is written for students facing the problem of keeping up-to-date regarding cytokines and cytokine-mediated events. ISBN 0-19-963388-6</p>	1 each	20.95	194438	<p>DICTIONARY OF BIOCHEMISTRY AND MOLECULAR BIOLOGY, 2nd Edition Stenesh, J. (Ed.), John Wiley and Sons, New York, NY, 1989, 525 pages, hard bound. This valuable reference features 16,000 entries. The terminology was compiled from numerous references and articles in chemistry, immunology, genetics, virology and microbiology. A cross-reference of synonyms is also provided. ISBN 0-471-84089-0</p>	1 each	152.00

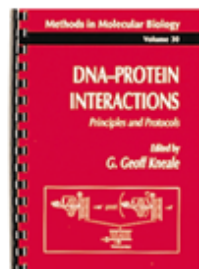

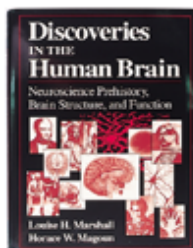

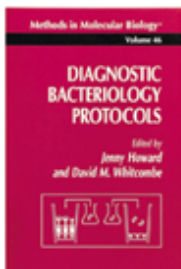

One call. One source.
 A world of biomedical products.

Books

198720	<p>DI FIORE'S ATLAS OF HISTOLOGY WITH FUNCTIONAL CORRELATIONS, 8th Edition Eroschenko, V.P., Williams and Wilkins, Baltimore, MD, 1996, 300 pages, soft bound. This edition, presents numerous colorful illustrations, with a section devoted to aiding students recognize structures under the microscope in terms of three dimensions. ISBN 0-68302-818-9</p>	1 each	65.00
198646	<p>DNA CLONING: A Practical Approach, 2nd Edition Volume 3: Complex Genomes Glover, D.M. and Hames, B.D. (Eds.), IRL Press at Oxford University Press, Oxford, UK, 1995, soft bound. This volume details methods for cloning in cosmids, the use of chromosome-specific gridded cosmid libraries, library construction of P1 phage vectors, the application of databases and computer networks in genome analysis and long range restriction mapping. ISBN 0-19-963567-6</p>	1 each	110.25
198861	<p>DISCOVERIES IN THE HUMAN BRAIN Marshall, Louise H. and Magoun, Horace W. (Eds.), Humana Press, Totowa, NJ, 1997, 336 pages, case bound. This engaging and engrossing history of the brain and the emergence of modern neuroscience chronicles the many significant people and events that gradually produced today's understanding of brain anatomy and physiology. ISBN 0-89603-435-6</p>	1 each	62.45
194506	<p>DNA CLONING: A Practical Approach, 2nd Edition Volume 1: Core Techniques D.M. Glover and B.D. Hames, IRL Press at Oxford University Press, New York, NY, 1995, 254 pages, Soft Cover. This volume offers details concerning transformation construction of cDNA and genomic libraries, probe preparation, analysis of gene organization and gene expression, <i>in vitro</i> mutagenesis, and DNA sequencing. ISBN 0-19-963476-9</p>	1 each	68.00
198821	<p>DNA DAMAGE AND REPAIR, VOLUME 1 Nickoloff, Jac A., Hoekstra, Merl F. (Eds.), Humana Press, Totowa, NJ, 1998, 640 pages, hard bound. Award-winning researchers review of key aspects of DNA damage and repair in prokaryotic and model eukaryotic systems, emphasizing the significant progress that has been made in the past five years. ISBN 0-89603-356-2</p>	1 each	131.25
194505	<p>DNA CLONING: A Practical Approach, 2nd Edition Volume 2: Expression Systems D.M. Glover and B.D. Hames, IRL Press at Oxford University Press, New York, NY, 1995, 254 pages, Soft Cover. This book offers detailed information of current procedures for the expression of cDNA clones in <i>E. coli</i> Lambda-Phage, yeast, and baculovirus expression systems. ISBN 0-19-963478-5</p>	1 each	68.00
198645	<p>DNA-PROTEIN INTERACTIONS Methods in Molecular Biology, Vol. 30 G. Geoff Kneale (Ed.), Humana Press, Totowa, NJ, 1994, 427 pages, comb bound. DNA-Protein Interactions presents clear and easy to follow protocols to illuminate the molecular basis of protein-nucleic acid interactions. ISBN 0-89603-256-6</p>	1 each	78.45

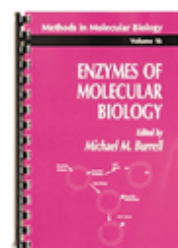

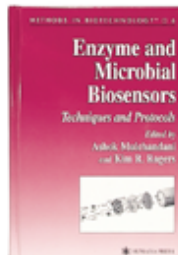

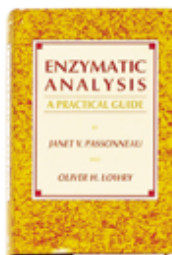

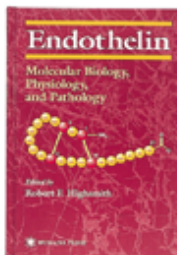

Books

198648	DNA-PROTEIN: Structural Interactions Lilley, D.M.J. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1995, 202 pages, soft bound. This book coordinates discoveries from several areas of molecular biology research to highlight the importance of DNA structure in the interactions between proteins and DNA. This is a valuable reference for the fields of biochemistry, biophysics, molecular biology and structural biology. ISBN 0-19-963453-X	1 each	57.75	198648	DNA SEQUENCING PROTOCOLS: Methods in Molecular Biology, Vol. 23 Hugh G. Griffin and Annette M. Griffin (Eds.), Humana Press, Totowa, NJ, 1993, 405 pages, comb bound. An all-star cast of investigators share their knowledge and experience in this most updated and comprehensive guide to DNA sequencing methods currently available. ISBN 0-89603-248-5	1 each	86.00
198708	DNA REPAIR AND MUTAGENESIS Friedberg, E., Walker, G.C. and Siede, W. ASM Press, Herndon, VA, 1997, 698 pages, hard bound. This text describes how living cells respond to genomic injury and alterations, focusing on both environmental affected damage and spontaneous genomic changes. Known diseases and disease syndromes with deficient cellular responses to DNA damage are discussed in the final chapter. ISBN 1-555-81-088-8D	1 each	95.00	198827	DNA TOPOISOMERASES PROTOCOLS Bjornsti, Mary-Ann and Osheroff, Neil (Eds.), Humana Press, Totowa, NJ, 1998, 400 pages, hard bound. An unprecedented collection of cutting-edge experimental protocols for investigating DNA structure, topology and DNA. ISBN 0-89603-444-5	1 each	78.25
194502	DNA REPLICATION, 2nd Edition A. Kornberg and T.A. Baker, W.H. Freeman and Co., New York, NY, 1991, 931 pages, Hard bound. This book offers up-to-date coverage of DNA Replication and related cellular processes. ISBN 0-7167-2003-5	1 each	110.00	194352	ELECTRON MICROSCOPY: Principles and Techniques for Biologists Bozzola, J.J. and Russell, L.D. (Eds.), Jones and Bartlett Publishers, Boston, MA, 1992, 542 pages, hard bound. An introduction to electron microscopy in an easy to understand format. Practical applications and theories are discussed in order to develop a further understanding of the principles for its employment. ISBN 0-86720-126-6	1 each	75.60
158395	DNA SCIENCE David A. Micklos and Greg A. Freyer, CSHL Press, Cold Spring Harbor, 1990, 477 pages, soft bound. "(DNA Science) has the elements of a textbook, laboratory manual, historical novel, and popular magazine article, yet is remarkably cohesive." -- Nature This new laboratory text combines the theory, practice, and applications of recombinant DNA technology into one articulated package. This book covers the basic techniques of gene isolation and analysis. Also, it contains easy to follow protocols with flowcharts and icons. ISBN 0-89278-411-3	1 each	57.00	194360	ELISA: Theory and Practice: Methods in Molecular Biology, Vol. 42 Crowther, J.R. (Ed.), Humana Press, Totowa, NJ, 1995, 220 pages, comb bound. This book describes the details fundametalis and applications of ELISA. It thoroughly covers all aspects of theory and practice. ISBN 0-89603-279-5	1 each	87.00

Books

194336	<p>THE ENCYCLOPEDIA OF MOLECULAR BIOLOGY Sir John Kendrew, Blackwell Scientific Publications, Oxford, England, 1994, 1,152 pages, hard bound. This reference offers essential background information and definitions presented in context. Brief entries are cross-matched to fully referenced article length entries to facilitate further research. ISBN 0-632-02182-9</p>	1 each	173.10
198721	<p>THE ENCYCLOPEDIA OF MOLECULAR BIOLOGY ON CD-ROM Blackwell Science, Inc., Cambridge, MA, 1995 This CD-rom contains the complete text and illustrations found in the above printed version. Features provided include: comprehensive indexing, phrase or single word search abilities, cross referencing, bookmark, annotate and print/copy abilities. System Requirements: 5Mb free hard drive space, 4 Mb RAM, 386 DX 33Mhz processor or better, Windows 3.1 or newer, VGA monitor or better.</p>	1 each	110.20
198867	<p>ENDOTHELIN Highsmith, Robert F. (Ed.), Humana Press, Totowa, NJ, 1997, 288 pages, case bound. A unique, integrated collection of original contributions on the molecular biology, physiology, and pathology of endothelin. Leading academic, clinical and industrial researchers summarize the dramatic recent progress in endothelin research and indicate the optimal direction of future studies. ISBN 0-89603-436-4</p>	1 each	104.45
159376	<p>ENZYMATIC ANALYSIS Janet v. Passonneau and Oliver H. Lowry, Humana Press, Totowa, NJ, 1993, 400 pages. This new edition of a classic laboratory manual covers the general principles, specific methods and procedures, and quantitative histochemistry of enzymatic analysis. ISBN 0-89603-238-8</p>	1 each	103.60
198833	<p>ENZYMATIC AND MICROBIAL BIOSENSORS Mulchandani, Ashok and Rogers, Kim (Eds.), Humana Press, Totowa, NJ, 1998, 284 pages, hard bound. A cutting-edge collection of detailed step-by-step techniques and protocols for constructing, evaluating and using enzyme- and microbial-based biosensors. <i>See companion volume: Affinity Biosensors: Protocols and Techniques.</i> ISBN 0-89603-410-0</p>	1 each	72.95
194523	<p>ENZYMATIC ASSAYS: A Practical Approach Eisenthal R. and Danson, M.J. (Eds.), IRL Press at Oxford University Press, Oxford, England, 1992, 351 pages, soft bound. Enzyme assays are commonly performed in biochemistry and in the clinical lab. In research, such tests are used to quantify the amount of enzyme present in cell or tissue cultures, measure metabolic activities, for purity analysis, and the determination of kinetic parameters. This text details the principles and specific examples of enzyme assays, as well as, their design and administration. ISBN 0-19-963143-3</p>	1 each	60.65
194213	<p>ENZYMATIC HISTOCHEMISTRY: A Laboratory Manual of Current Methods Van Noorden, C.J.F. and Frederiks, W.M. (Eds.), Bios Scientific Publications, Oxford, England, 1992, 122 pages, soft bound. A laboratory handbook covering the current enzyme histochemical techniques available for light microscopy. ISBN 0-19-856434-1</p>	1 each	38.55
159357	<p>ENZYMES OF MOLECULAR BIOLOGY: Methods in Molecular Biology, Vol. 16 Michael M. Burrell (Ed.), Humana Press, Totowa, NJ, 1993, 384 pages, comb bound. Key information on a wide range of enzymes commonly used in molecular biology. This book helps minimize time spent researching the literature. ISBN 0-89603-234-5</p>	1 each	68.80

Books

198649	<p>EPITHELIAL CELL CULTURE: A Practical Approach Shaw, A.J. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1996, 248 pages, soft bound. This text provides methods for cultivating in-vitro epithelial "tissue" and useful applications for studying pharmacology, toxicology and cell biology. ISBN 0-19-963572-2</p>	1 each	57.75	194329	<p>FIXATION, DEHYDRATION AND EMBEDDING OF BIOLOGICAL SPECIMENS: Practical Methods in Electron Microscopy Glauert, A.M. (Ed.), Portland Press, London, England, 207 pages, soft bound. Electron micrographs lend significance in the education and communication within the area of research. Virtually every textbook features illustrations in color depicting current and past discoveries. This book covers the principles involved for preparing samples for successful examination. ISBN 0-7204-4257-5</p>	1 each	23.65
198650	<p>EUCARYOTIC GENE TRANSCRIPTION Goodbourn, S. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1996, 312 pages, soft bound. This book focuses on the essentials of transcription that were worked out on prokaryotic cells, but are valid for eukaryotic cells and the important differences, especially in regulation; histones in transcriptional control; homeodomain proteins and Rel transcription complexes. ISBN 0-19-963486-6</p>	1 each	57.75	194214	<p>FLOW CYTOMETRY Ormerod, M.G. (Ed.), Bios Scientific Publications, Oxford, England, 1994, 88 pages, soft bound. This practical guide describes routine applications of flow cytometry and the more recent applications of this exciting technology. ISBN 1-872748-39-2</p>	1 each	33.00
198651	<p>EXTRACELLULAR MATRIX: A Practical Approach Haralson, M.A. and Hassell, J.R. (Eds.), IRL Press at Oxford University Press, Oxford, UK This text merges the biochemical, immunological, and molecular biological techniques and approaches required for studying extracellular matrices and their function in vertebrates. ISBN 0-19-859933-1</p>	1 each	47.25	194355	<p>FLOW CYTOMETRY AND SORTING, 2nd Edition Melamed, M.R., Lindmo, T. and Mendelsohn, M.L. (Eds.), Wiley-Liss, New York, NY, 1990, 824 pages, hard bound. This book presents current reviews touching on all areas of flow cytometry such as cell preparation procedures, instrumentation, staining, analysis of data, cell biology applications, cell type examination, and clinically-oriented investigation. ISBN 0-471-56235-1</p>	1 each	188.95
154431	<p>FIRST AID MANUAL FOR CHEMICAL ACCIDENTS, 2nd Edition M.J. Lefevre and S.A. Conibear, Van Nostrand Reinhold, New York, NY, 1989, 261 pages, soft bound. Your obligation to the safety of your laboratory demands that workers and researchers have access to this manual. In case of emergency, this guide provides specific advice for action. Pages are color coded, making specific topics easy to locate. ISBN 0-442-20490-6</p>	1 each	43.75	194497	<p>FLOW CYTOMETRY: A Practical Approach, 2nd Edition Ormerod, M.G. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1994, 320 pages, soft bound. An expanded revision with new information on DNA analysis, chromosome analysis, surface marker immunofluorescence and the measurement of cytoplasmic and nuclear antigens. It describes advances in cell biology applications. ISBN 0-19-963461-0</p>	1 each	75.00
