

## Books

198649	<p><b>EPITHELIAL CELL CULTURE: A Practical Approach</b> Shaw, A.J. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1996, 248 pages, soft bound. This text provides methods for cultivating in-vitro epithelial "tissue" and useful applications for studying pharmacology, toxicology and cell biology. ISBN 0-19-963572-2</p>	1 each	57.75	194329	<p><b>FIXATION, DEHYDRATION AND EMBEDDING OF BIOLOGICAL SPECIMENS: Practical Methods in Electron Microscopy</b> Glauert, A.M. (Ed.), Portland Press, London, England, 207 pages, soft bound. Electron micrographs lend significance in the education and communication within the area of research. Virtually every textbook features illustrations in color depicting current and past discoveries. This book covers the principles involved for preparing samples for successful examination. ISBN 0-7204-4257-5</p>	1 each	23.65
198650	<p><b>EUCARYOTIC GENE TRANSCRIPTION</b> Goodbourn, S. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1996, 312 pages, soft bound. This book focuses on the essentials of transcription that were worked out on prokaryotic cells, but are valid for eukaryotic cells and the important differences, especially in regulation; histones in transcriptional control; homeodomain proteins and Rel transcription complexes. ISBN 0-19-963486-6</p>	1 each	57.75	194214	<p><b>FLOW CYTOMETRY</b> Ormerod, M.G. (Ed.), Bios Scientific Publications, Oxford, England, 1994, 88 pages, soft bound. This practical guide describes routine applications of flow cytometry and the more recent applications of this exciting technology. ISBN 1-872748-39-2</p>	1 each	33.00
198651	<p><b>EXTRACELLULAR MATRIX: A Practical Approach</b> Haralson, M.A. and Hassell, J.R. (Eds.), IRL Press at Oxford University Press, Oxford, UK This text merges the biochemical, immunological, and molecular biological techniques and approaches required for studying extracellular matrices and their function in vertebrates. ISBN 0-19-859933-1</p>	1 each	47.25	194355	<p><b>FLOW CYTOMETRY AND SORTING, 2nd Edition</b> Melamed, M.R., Lindmo, T. and Mendelsohn, M.L. (Eds.), Wiley-Liss, New York, NY, 1990, 824 pages, hard bound. This book presents current reviews touching on all areas of flow cytometry such as cell preparation procedures, instrumentation, staining, analysis of data, cell biology applications, cell type examination, and clinically-oriented investigation. ISBN 0-471-56235-1</p>	1 each	188.95
154431	<p><b>FIRST AID MANUAL FOR CHEMICAL ACCIDENTS, 2nd Edition</b> M.J. Lefevre and S.A. Conibear, Van Nostrand Reinhold, New York, NY, 1989, 261 pages, soft bound. Your obligation to the safety of your laboratory demands that workers and researchers have access to this manual. In case of emergency, this guide provides specific advice for action. Pages are color coded, making specific topics easy to locate. ISBN 0-442-20490-6</p>	1 each	43.75	194497	<p><b>FLOW CYTOMETRY: A Practical Approach, 2nd Edition</b> Ormerod, M.G. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1994, 320 pages, soft bound. An expanded revision with new information on DNA analysis, chromosome analysis, surface marker immunofluorescence and the measurement of cytoplasmic and nuclear antigens. It describes advances in cell biology applications. ISBN 0-19-963461-0</p>	1 each	75.00

## Books

194433	<b>FLOW CYTOMETRY PRINCIPLES FOR CLINICAL LABORATORY PRACTICE</b> Owens, M.A. and Loken, M.R. (Eds.), Wiley-Liss, New York, NY, 1995, 224 pages, soft bound. A valuable reference outlining basic principles and applications. It serves as a useful resource for beginners and experienced researchers. It touches on all aspects of flow cytometry including the quantitative cytometric systems for immunology and hematology studies. ISBN 0-471-02176-8	1 each	69.00	159210	<b>FOOTPRINTING OF NUCLEIC ACID-PROTEIN COMPLEXES</b> Arnold Revzin (Ed.), Academic Press, San Diego, CA, 1993, 195 pages, wire bound. This book provides protocols for studying the stoichiometry, binding site size and location of nucleic acids interacting with proteins. ISBN 0-12-586500-7	1 each	57.80
194327	<b>FLUORESCENCE MICROSCOPY OF LIVING CELLS IN CULTURE, Part A</b> Wang, Y. and Taylor, D.L. (Eds.), Academic Press, San Diego, CA, 1989, 328 pages, soft bound. The first of a two part series covering fluorescent techniques in research. This part focuses on fluorescent analogs, cell labeling with fluorescent compounds, and basic microscopy. ISBN 0-12-684754-1	1 each	57.85	198846	<b>FREE RADICAL AND ANTIOXIDANT PROTOCOLS</b> Armstrong, Donald (Ed.), Humana Press, Totowa, NJ, 1998, 480 pages. An outstanding collection of state-of-the-art methodologies for quantifying free radical and antioxidant analytes in tissue and body fluids using experimental models and in vitro procedures. ISBN 0-89603-472-0.	1 each	93.95
194326	<b>FLUORESCENCE MICROSCOPY OF LIVING CELLS IN CULTURE, Part B</b> Wang, Y. and Taylor, D.L. (Eds.), Academic Press, San Diego, CA, 1989, 498 pages, soft bound. Continuing on the aspects of fluorescence techniques in research, this second part publication concentrates on quantitative fluorescence imaging and spectroscopy. ISBN 0-12-684755-X	1 each	57.85	198829	<b>FORENSIC DNA PROFILING PROTOCOLS</b> Lincoln, Patrick and Thomson, Jim (Eds.), Humana Press, Totowa, NJ, 1998, 312 pages, hard bound. Leading forensic experts from around the world describe in detail their time-proven methods for identity testing through DNA analysis. Their state-of-the-art collection of easily reproducible methods includes all of the major techniques of DNA analysis. ISBN 0-89603-443-7	1 each	83.45
194328	<b>FLUORESCENCE MICROSCOPY OF LIVING CELLS IN CULTURE, Part A and B</b> Wang, Y. and Taylor, D.L. (Eds.), Academic Press, San Diego, CA, 1989, 498 pages, soft bound. A set of parts A and B.	1 set	108.05	159265	<b>FREE RADICALS IN AGING</b> Byung Pal Yu, CRC Press, Boca Raton, FL, 1993, 288 pages. Free Radicals in Aging features new findings concerning the involvement of free radicals in the aging process. ISBN 0-8493-4518-9	1 each	123.85
159264	<b>FLUORESCENT PROBES IN CELLULAR AND MOLECULAR BIOLOGY</b> Jan Slavik, CRC Press, Boca Raton, FL, 1994, 320 pages. This publication presents the most comprehensive evaluation of the theory, instrumentation, and practical applications of fluorescent probes available. ISBN 0-8493-6892-8	1 each	205.00	159299	<b>FUNDAMENTALS OF RADIOCHEMISTRY</b> Jean-Pierre Adloff and Robert Guillaumont, CRC Press, Boca Raton, FL, 1993, 448 pages. A comprehensive overview of the principles, objectives, and methods of radiochemistry and how they are applied in various fields of chemistry. ISBN 0-8493-4244-9	1 each	121.55

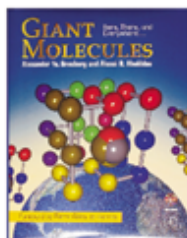

## Books

194358	<b>GAS CHROMATOGRAPHY: A Practical Approach</b> Baugh, P.J. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1994, 448 pages, soft bound. All major areas of gas chromatography from instrumentation to chemical derivatization are presented in this text. Other topics include analytical toxicology, environmental analysis, petroleum exploration, and chrial separations. ISBN 0-19-963271-5	1 each	55.00		
159218	<b>GENE AND CHROMOSOME ANALYSIS: Methods in Molecular Genetics, Vol. 2</b> Kenneth W. Adolph (Ed.), Academic Press, San Diego, CA, 1993, 366 pages. This volume primarily is concerned with the application of molecular biology and genetic methods to eukaryotic cells. ISBN 0-12-044303-1	1 each	98.40		
159244	<b>GENE EXPRESSION: General and Cell-Type Specific</b> M. Karin (Ed.), Birkhauser, Secaucus, NJ, 1993, 250 pages, hard bound. This collection of review articles provides a comprehensive introduction to this important area of molecular biology. ISBN 0-8176-3605-6	1 each	91.45		
194521	<b>GEL ELECTROPHORESIS: Essential Data Series</b> Patel, D. (Ed.), John Wiley and Sons, New York, NY, 1994, 146 pages, soft bound. A comprehensive presentation of data on protein, nucleic acid, nucleoprotein, and carbohydrate gel electrophoresis. It also discusses electrophoresis reagents, instrumentation, vendors, and problem solving. ISBN 0-471-94306-1	1 each	34.95		
194203	<b>GEL ELECTROPHORESIS: Nucleic Acids</b> Martin, R. (Ed.), Bios Scientific Publications, Oxford, England, 1995, 160 pages, soft bound. This is an easy-to-follow practical guide that summarizes the theoretical background of gel electrophoresis of nucleic acids as well. Anyone involved in research will benefit from the details presented here and become a master of technique. ISBN 1-872748-28-7	1 each	44.05		
159363	<b>GEL ELECTROPHORESIS OF NUCLEIC ACIDS, 2nd Edition</b> D. Rickwood and B.D. Hames (Eds.), Oxford University Press, NY, 1990, 311 pages, soft bound. This updated edition of the book originally published in 1982 presents techniques in pulsed field electrophoresis, interaction of protein with DNA and purification of synthetic oligonucleotides among others. ISBN 0-19-963083-6	1 each	57.85		
194434	<b>GENE TARGETING: A Practical Approach</b> Joynner, A.L. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1993, 234 pages, soft bound. This publication details gene targeting vector design, as well as, current techniques in ES cell manipulation. Furthermore, it presents material on the culturing and assaying of mouse and human bone marrow stem cells, and ES cell chimera production. Presented are established protocols and help on their administration for specific applications. ISBN 0-19-963406-8	1 each	60.00		
159218	<b>GENE AND CHROMOSOME ANALYSIS: Methods in Molecular Genetics, Vol. 2</b> Kenneth W. Adolph (Ed.), Academic Press, San Diego, CA, 1993, 366 pages. This volume primarily is concerned with the application of molecular biology and genetic methods to eukaryotic cells. ISBN 0-12-044303-1	1 each	98.40		

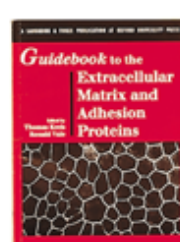

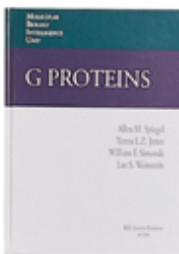

## Books

159309	<b>GENE TRANSCRIPTION: A Practical Approach</b> B. David Hames and Stephen J. Higgins (Eds.), Oxford University Press, Oxford, UK, 1993, 384 pages, soft bound. This book concentrates on RNA polymerase II transcription of eukaryotic protein-coding systems. ISBN 0-19-963291-X	1 each	57.85	159358	<b>GLYCOPROTEIN ANALYSIS IN BIOMEDICINE: Methods in Molecular Biology, Vol. 14</b> Elizabeth F. Hounsell (Ed.), Humana Press, Totowa, NJ, 1993, 320 pages, comb bound. This book brings together a comprehensive range of protocols related to carbohydrate biochemistry. ISBN 0-89603-226-4	1 each	74.65
159378	<b>GENE TRANSFER AND EXPRESSION</b> Michael Kriegler, Oxford University Press, Oxford, UK, 1990, 242 pages, comb bound. A laboratory manual for the student or researcher that covers background information, gene transfer methods and assays for expression. ISBN 0-7167-7004-0	1 each	55.55	198709	<b>GOODMAN AND GILMAN'S: THE PHARMACOLOGICAL BASIS OF THERAPEUTICS, 9th Edition</b> Hardman, J.G., Limbird, L.E., Molinoff, P.B., Ruddon, R.W. and Gilman, A.G. (Eds.), McGraw-Hill, New York, NY, 1995, 1700 pages, hard bound. This edition contains new chapters on gene therapy, migraine treatments, the use of serotonin receptor drugs and acular pharmacology. New color graphics, chapter synopses and overviews of clinical trials make this new edition easy-to-use. ISBN 0-0702-6266-7	1 each	115.00
198613	<b>GIANT MOLECULES: Here, There and Everywhere</b> Grosberg, A.Y. and Khokhlov, A.R., Academic Press, San Diego, CA, 1997, 244 pages, hard bound. This informative text illustrates the nature of giant molecules. It explains what they are, how they are formed, how and where they can be applied and why they are important. In addition, an interactive CD Rom is provided that can be used to simulate polymer behavior. ISBN 0-12304-130-9	1 each	41.95	159266	<b>G PROTEINS</b> Allen M. Spiegel, et al., CRC Press, Boca Raton, FL, 1994, 121 pages. G Proteins provides an overview of receptor and effector structure and function. It also features a detailed examination of the molecular and cell biology of the G proteins. ISBN 1-57059-024-9	1 each	104.10
198830	<b>GLYCOANALYSIS PROTOCOLS</b> Hounsell, Elizabeth F., (Ed.), Humana Press, Totowa, NJ, 1998, 300 pages, hard bound. This text makes available to all protein scientists and particularly those working in today's pharmaceuticals industry, the most advanced and reproducible glycoanalysis techniques. These protocols will well serve anyone starting work on the analysis of glycoproteins, as well as experienced investigators seeking to carry their expertise to higher levels of accomplishment. ISBN 0-89603-355-4	1 each	67.75	198857	<b>G PROTEINS, RECEPTORS, AND DISEASE</b> Spiegel, Allen M. (Ed.), Humana Press, Totowa, NJ, 1998, 336 pages, case bound. This collection of cutting-edge chapters summarizes in depth the state of our knowledge today concerning how cells communicate via G protein-coupled signal transduction and how defects in these proteins and their receptors can cause serious human disease involving many different organ systems. ISBN 0-89603-430-5	1 each	141.75

## Books

159524	<b>GRANT APPLICATION WRITER'S HANDBOOK</b> Reif-Lehrer, Jones & Bartlett Publishers, Boston, Mass 1995, 472 pages, soft cover A valuable reference for all types of grant writers, this book gives particular attention to the writing of NIH and NSF grant applications. This book expands on the author's previous title "Writing a Successful Grant Application." ISBN 0-86720-874-X	1 each	42.00	159311	<b>GUIDEBOOK TO THE EXTRACELLULAR MATRIX AND ADHESION PROTEINS</b> Thomas E. Kreis and Ronald D. Vale (Eds.), Oxford University Press, Oxford, UK, 1993, 192 pages, soft bound. A concise compendium of the proteins found in the extracellular matrix. ISBN 0-19-859933-1	1 each	44.00
194377	<b>GRAY'S ANATOMY, 13th American Edition</b> Clemente, C.D. (Ed.), Lea and Febiger, Philadelphia, PA, 1985, 1,676 pages, hard bound. A complete and informative reference detailing the human body. It features black and white and color illustrations, diagrams, figures, schematics and photographs. ISBN 0-8121-0644-X	1 each	98.65	194349	<b>GUIDEBOOK TO THE SECRETORY PATHWAY</b> Rothblatt, J., Novick, P. and Stevens, T. (Eds.), Sambrook and Tootze Publication at Oxford University Press, Oxford, England, 1994, 308 pages, soft bound. This book examines various details of the secretory pathway featuring 200 entries. Current information with brief bibliographies on cell-cycle control and membrane traffic is included. ISBN 0-19-859941-2	1 each	47.25
159310	<b>GROWTH FACTORS: A Practical Approach</b> Ian A. McKay and Irene Leigh (Eds.), Oxford University Press, Oxford, UK, 1993, 272 pages, soft bound. This book is a step-by-step guide to studying growth factors. It also covers the detection and study of growth inhibitory factors. ISBN 0-19-963359-2	1 each	47.25	194321	<b>GUIDE TO ELECTROPORATION AND ELECTROFUSION</b> Chang, D.C., Chassy, B.M., Saunders, J.A. and Sowers, A.E. (Eds.), Academic Press, San Diego, CA, 1992, soft bound. A presentation of protocols essential for the successful electroporation and electrofusion of bacteria, yease, animal and plant cells. ISBN 0-12-168041-X	1 each	61.95
159369	<b>GROWTH HORMONE II</b> Barry B. Bercu and Richard F. Walker (Eds.), Springer-Verlag, NY, 1994, 379 pages, hard bound. This book is a compendium of proceedings from the symposium on Growth Hormone II: Basic and Clinical Aspects. ISBN 0-387-94133-9	1 each	149.30	154420	<b>GUIDE TO MOLECULAR CLONING TECHNIQUES: Methods in Enzymology, Vol. 152</b> S.L. Berger and A.R. Kimmel, Ed., Academic Press, San Diego, CA, 1987, 812 pages, soft bound. This comprehensive guide covers topics such as: Genomic cloning; Preparation and characterization of mRNA; Identification and characterization of clones; cDNA cloning and screening libraries, all in a quantitative, problem-solving approach. ISBN 0-12-181775-X	1 each	72.35
194779	<b>GUIDEBOOK TO CYTOKINES AND THEIR RECEPTORS</b> Nicola, N.A. (Ed.), Sambrook and Tootze Publication at Oxford University Press, New York, NY, 1994, 260 pages, soft bound. An essential reference for any individual involved in cytokine, growth factor, interleukin, and lymphokine research. In addition, this text covers all receptors of the aforementioned cytokines and features more than 70 separate monographs. ISBN 0-19-859946-3	1 each	52.50				

One call. One source.  
A world of biomedical products.

## Books

194319	<b>GUIDE TO PROTEIN PURIFICATION: Methods in Enzymology, Vol. 182</b> Deutscher, M.P. (Ed.), Academic Press, San Diego, CA, 1990, 894 pages, soft bound. This valuable reference covers current procedures involved in characterizing, purifying, and handling enzymes and proteins. It is ideal for any beginner, student, and experienced researcher. ISBN 0-12-213585-7	1 each	66.10	198615	<b>HANDBOOK OF IMMUNOCHEMISTRY</b> Ferenick, M., Chapman and Hall, New York, NY, 1993, 512 pages, hard bound. This handbook provides practical information and data required by the practicing immunologist and for curious novices. ISBN 0-41235-980-4	1 each	141.70
198614	<b>GUIDE TO SPECTROSCOPIC IDENTIFICATION OF ORGANIC COMPOUNDS</b> Feinstein, K., CRC Press, Inc., Boca Raton, FL, 1995, 120 pages, soft bound. This is a practical guide to determining molecular structure from spectral data obtained from MS, IR, NMR or UV spectrophotometers. Spectral features and a picture of the relationship of structure to physical properties is provided. ISBN 0-84939-448-1	1 each	41.95	159300	<b>HANDBOOK OF MICROBIOLOGICAL MEDIA</b> Ronald M. Atlas, CRC Press, Boca Raton, FL, 1993, 1088 pages. A comprehensive volume that brings together descriptions of media from numerous sources and the specialized formulations of numerous researchers. ISBN 0-8493-2944-2	1 each	141.75
159211	<b>GUIDE TO TECHNIQUES IN GLYCOBIOLOGY</b> John N. Abelson and Melvin I. Simon (Eds.), Academic Press, San Diego, CA, 1994, 519 pages, comb bound. A volume which fully describes a wide variety of methods used in glycobiochemistry research, each of which provides background material explaining the basis of the application. ISBN 0-12-443665-X	1 each	63.70	194460	<b>HANDBOOK OF MOLECULAR AND CELLULAR METHODS IN BIOLOGY AND MEDICINE</b> Kaufman, P.B., Wu, W., Kim, D. and Cseke, L.J. (Eds.), CRC Press, Boca Raton, FL, 1995, 496 pages, hard bound. A comprehensive guide to current techniques in the isolation and purification of DNA, RNA, and proteins, using probes, blotting, sequencing, PCR, tissue culture, gene expression in transgenic animals, and more. It covers modern protocols, the basic principles, and tips on problem solving. ISBN 0-8493-2511-0	1 each	88.15
159475	<b>HANDBOOK OF CAPILLARY ELECTROPHORESIS</b> James P. Landers (Ed.), CRC Press, Boca Raton, FL, 1994, 649 pages, hard bound. This book discusses the practical and theoretical aspects of capillary electrophoresis and its applications in clinical, production, and research sample analysis. ISBN 0-8493-8690-X	1 each	134.30	159213	<b>HANDBOOK OF MUCOSAL IMMUNOLOGY</b> Pearay Ogra, et al. (Eds.), Academic Press, San Diego, CA, 1994, 1264 pages. The Handbook of Mucosal Immunology covers the entire spectrum of mucosal immunity. ISBN 0-12-524730-3	1 each	248.90
				159267	<b>HANDBOOK OF RECEPTORS AND CHANNELS: G Protein-Coupled Receptors, Vol. 1</b> Stephen J. Peroutka (Ed.), CRC Press, Boca Raton, FL, 1993, 336 pages. The Handbook of Receptors and Channels is the first handbook series to present new molecular biological receptor data in a practical and useful format. ISBN 0-8493-8321-8	1 each	162.75
