

Books

194395	<p>MANIPULATING THE MOUSE EMBRYO: A Laboratory Manual, 2nd Edition Hogan, B., Beddington, R., Costantini, F. and Lacy, E. (Eds.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1994, 500 pages, comb bound. A revision of the first edition with added information on current advances in recombinant DNA technology applications. It serves as a comprehensive and valuable source of technical guidance. ISBN 0-87969-384-3</p>	1 each	104.75	198622	<p>MANUAL ON MEMBRANE LIPIDS Prasad, R., Birkhauser Boston, Cambridge, MA, 1996, 300 pages, spiral bound. This text is a valuable manual for anyone researching membranes, from the structure of membrane components to their function in transport. Topics covered in detail include treatments of membrane fractionation, analysis of lipid composition, turnover, signal transduction and liposomes. ISBN 3-54059-448-5</p>	1 each	82.95
198711	<p>MANUAL OF CLINICAL LABORATORY IMMUNOLOGY, 5th Edition Rose, N.R. (Ed.), ASM Press, Herndon, VA, 1997, 1282 pages, hard bound. This reference contains up-to-date information required for any clinical immunology laboratory. Emphasis is placed on laboratory tests and their applications, including the advantages of molecular methods over antibody probes. ISBN 1-555-81-118-3</p>	1 each	131.25	198712	<p>MARTINDALE: The Extra Pharmacopoeia, 31st Edition Reynolds, J.E.F. (Ed.), The Pharmaceutical Press, London, UK, 1996, 2,363 pages, hard bound. This index of drugs and medicines available world-wide has been completely revised. Information is up-to-date with an index of every drug name, synonym, code, chemical name and preparation name or title. An index of diseases and conditions requiring treatment are also included.</p>	1 each	330.75
159242	<p>MANUAL OF CLINICAL MICROBIOLOGY, 6th Edition Albert Balows (Ed.), ASM Press, Herndon, VA, 1991, 1,364 pages, hard bound. A valuable reference to any laboratory performing clinical microbiologic studies. ISBN 1-55581-0861</p>	1 each	113.45	198623	<p>MASS SPECTROMETRY FOR BIOTECHNOLOGY Suizdak, G., Academic Press, San Diego, CA, 1996, 161 pages, soft bound. As mass spectrometry becomes practical for large molecules and for biological research, biotechnologists require training on this technique. This text designed for biology research contains valuable illustrations and practical examples. ISBN 0-12647-471-0</p>	1 each	31.45
198849	<p>MANUAL OF IMMUNOLOGICAL METHODS Hollinger, Manfred A. (Ed.), CRC Press, Boca Raton, FL, 1998, 176 pages. The manual represents the collaboration of the Canadian Network of Toxicology Centers, a non-profit network of university-based scientists dedicated to research, training, risk assessment and communication. This manual provides detailed immunological methods that can be utilized by researchers or practitioners who want to enhance the successful application of this science. ISBN 0-8493-8558-X</p>	1 each	80.00	198843	<p>MATRIX METALLOPROTEINASES Parks, William and Mecham, Robert P. (Eds.), Academic Press, San Diego, 1998, case bound. The chapters in this book cover the structure, regulation and function of matrix metalloproteinases, and provide information on the latest strategies to inhibit enzyme activity. This work will be an indispensable reference tool for investigators with an interest in extracellular matrix biology, matrix turnover, enzymology and biochemistry of proteinases, developmental biology, pathology and therapeutic interventions. ISBN 0125450907</p>	1 each	94.45

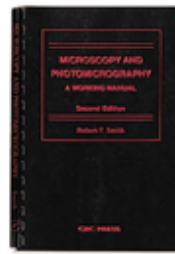

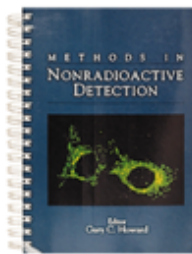

Books

198624	MECHANISM IN PROTEIN CHEMISTRY Kyte, J., Garland Publishing, 1995, 540 pages, hard bound. This text provides advanced lessons on the mechanisms of enzymatic catalysis. Topics discussed include substrate binding at active sites, conformational control, general acid and base catalysis, reaction intermediates and the role of coenzymes. ISBN 0-81531-700-X	1 each	69.30
194317	MEDICAL MICROBIOLOGY: A Short Course Baron, E. (Ed.), Wiley-Liss, New York, NY, 1994, 1,057 pages, soft bound. A concise compilation describing the principles of current medical microbiology including bacteriology, mycology, parasitology, and virology. It is ideal for use as a student textbook or quick reference for clinicians. ISBN 0-471-56728-0	1 each	55.05
194275	MEDICAL MYCOLOGY Kwon-Chung, K.J. and Bennett, J.E. (Eds.), Lea and Febiger, Philadelphia, PA, 1992, 865 pages, hard bound. This book discusses mycology, superficial mycosis, antifungal agents, subcutaneous and deep mycosis, algae infections, and fungal infections in the laboratory setting. ISBN 0-8121-1463-9	1 each	82.70
198658	MEDICAL PARASITOLOGY: A Practical Approach Gillespie, S.H. and Hawkey, P.M. (Eds.), IRL Press at Oxford University Press, Oxford, UK, 1995, 295 pages, soft cover. This text covers the diagnosis of many parasitic infections including malaria, toxoplasmosis, intestinal protozoa, intestinal amoebic and helminth infections, leishmania and trypanosoma. Histopathology of parasitic diseases is also discussed. ISBN 0-19-963300-2	1 each	68.25
194430	MEDICAL STATISTICS: A Common Sense Approach, 2nd Edition Campbell, M.J., Machin, D. (Eds.), John Wiley and Sons, New York, NY, 1993, 183 pages, soft bound. This text describes the use and misuse of statistics in medical science. It focuses on the common pitfalls, and it is an excellent guide for anyone involved with laboratory testing. ISBN 0-471-93764-9	1 each	33.00
198657	MEDICAL VIROLOGY: A PRACTICAL APPROACH Desselburger, U. (Ed.), IRL Press at Oxford University Press, Oxford, UK, 1995, 214 pages, soft bound. This text provides a comprehensive guide to traditional techniques of viral diagnosis including immunoassays, nucleic acid detection and blotting of viral proteins. The design and testing of antiviral compounds, molecular epidemiology and the evolutionary analysis of viruses are discussed. ISBN 0-19-963329-0	1 each	57.75
198713	MEDICINAL CHEMISTRY: Principles and Practice King, F.D. (Ed.), The Royal Society of Chemistry, Cambridge, UK, 1994, 313 pages, soft bound. This text provides essential information for students studying medicinal chemistry and for pharmacologists working in the pharmaceutical industry.	1 each	79.10
194320	METHODS IN CELLULAR IMMUNOLOGY Fernandez-Botran, R. and Vetvicka, V. (Eds.), CRC Press, Boca Raton, FL, 1995, 250 pages, hard bound. An easy-to-follow reference providing details to applications, procedures, limitations, background information, and alternatives of cellular immunology. Among the techniques described are flow cytometry, cytokine assays, cytokine receptors, cell isolation, and immunoassays. ISBN 0-8493-6548-1	1 each	88.15
194208	MEMBRANE ANALYSIS Higgins, J.A. and Graham, J.M. (Eds.), Bios Scientific Publications, Oxford, England, 1995, 160 pages, soft bound. An introduction on the basic principles and methods for the preparation of biological membranes and analysis of their structural and molecular make up. In addition, it details dissection methodologies of membrane trafficking. ISBN 1-872748-88-0	1 each	44.05

Books

159216	<p>MEMBRANE FUSION TECHNIQUES, PART A: Methods in Enzymology, Vol. 220 John N. Abelson and Melvin I. Simon (Eds.), Academic Press, San Diego, CA, 1993, --91 pages. Principle techniques used in membrane fusion research are presented in this volume. ISBN 0-12-182122-8</p>	1 each	110.25
159217	<p>MEMBRANE FUSION TECHNIQUES, PART B: Methods in Enzymology, Vol. 221 John N. Abelson and Melvin I. Simon (Eds.), Academic Press, San Diego, CA, 1993, --448 pages. Membrane Fusion Techniques, part B, is a continuation of part A and presents principal techniques used in membrane fusion research. ISBN 0-12-182122-6</p>	1 each	110.25
193585	<p>THE MERCK INDEX, 12th EDITION Centennial Edition Budavari, S., Ed., Merck & Co., Rahway, NJ, 1996, approx. 2,500 pages, hard bound. The Merck Index has been published for over 100 years. This one-volume encyclopedia of chemicals, drugs, and biological substances has established itself as an internationally recognized reference work, a source of authoritative information and a valued laboratory and teaching companion. ISBN 0-911910-28-X</p>	1 each	47.25
195599	<p>THE MERCK INDEX on CD-ROM, 12th Ed. Macintosh Version This electronic format of the Merck Index features multiple search modes including chemical, generic, or trade names. Additionally, searches may be made by molecular weight, molecular formula, physical data, CAS number, and more. This CD-ROM allows structures and sub-structures to be drawn on screen and retrieve all matching monographs. System Requirements: 68040 with a minimum of 8 MB RAM and system 7 or higher.</p>	1 each	275.60
195598	<p>THE MERCK INDEX on CD-ROM, 12th Ed. Windows Version This electronic format of the Merck Index features multiple search modes including chemical, generic, or trade names. Additionally, searches may be made by molecular weight, molecular formula, physical data, CAS number, and more. This CD-ROM allows structures and sub-structures to be drawn on screen and retrieve all matching monographs. System Requirements: 80386 or better with a minimum of 8 MB RAM, a minimum of 7 MB of hard drive availability, Windows 3.1x or Windows95.</p>	1 each	275.60
159239	<p>METHODS FOR GENERAL AND MOLECULAR BACTERIOLOGY Philipp Gerhardt (Ed.), ASM Press, Herndon, VA, 1993, 803 pages, hard bound. A major revision of the classic manual first printed in 1981 by ASM. ISBN 1-55581-048-9BS</p>	1 each	83.35
194297	<p>METHODS FOR PROTEIN ANALYSIS: A Practical Guide to Laboratory Protocols Copeland, R.A. (Ed.), Chapman and Hall, London, England, 1993, 224 pages, spiral bound. This publication describes essential applications for general protein analysis. It places emphasis on methodology rather than theory and details methods readily accomplished in a standard protein laboratory. ISBN 0-412-03741-6</p>	1 each	72.40
159238	<p>METHODS IN NON-RADIOACTIVE DETECTION Gary C. Howard (Ed.), Appleton & Lange, East Norwalk, CT, 1993, 342 pages, soft bound. A volume for the researcher including a collection of non-radioactive detection techniques. ISBN 0-8385-6946-3</p>	1 each	55.50

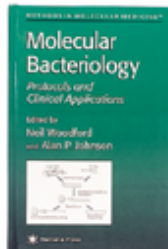

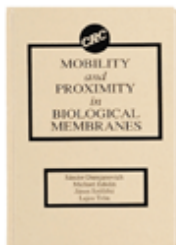

One call. One source.
A world of biomedical products.

Books

194462	MICROBES IN ACTION: A Laboratory Manual of Microbiology, 4th Edition Seeley, H.W., Jr., VanDemark, P.J. and Lee, J.J. (Eds.), W.H. Freeman, New York, NY, 1991, 450 pages, soft bound. A basic laboratory guide to the principles and techniques involved with the isolation, growth, and control of microorganisms and their application in medicine, industry, and agriculture. ISBN 0-7167-2100-7	1 each	45.00
194209	MICROBIAL CULTURE Isaac, S. and Jennings, D. (Eds.), Bios Scientific Publications, Oxford, England, 1995, 160 pages, soft bound. This comprehensive introduction describes the principles and practice of culture techniques of all the major microbe groups with emphasis on bacteria and fungi. It is highly recommended for anyone just beginning microorganism cultures. ISBN 1-872748-92-9	1 each	44.05
194296	MICROPROPAGATION: Technology and Application Debergh, P.C. and Zimmerman, R.H. (Eds.), Kluwer Academic Publishers, The Netherlands, 1991, 484 pages, soft cover. A publication providing an overview of the field of micropagation. It features a basic review of this area of plant tissue culture, as well as, a sound foundation for future advances. ISBN 0-7923-0819-0	1 each	92.50
159272	MICROSCOPY AND PHOTOMICROGRAPHY, 2nd Edition Robert F. Smith, CRC Press, Boca Raton, FL, 1993, 162 pages, comb bound. This working manual is devoted to explaining the correct procedures for setting up and aligning the optical system of a microscope. ISBN 0-8493-8682-9	1 each	60.90
159273	MOBILITY AND PROXIMITY IN BIOLOGICAL MEMBRANES Sandor Damjanovich, et al., CRC Press, Boca Raton, FL, 1994, 416 pages. This book provides an overview of the results obtained from biophysical methods for probing the organization of cell surface membranes. ISBN 0-8493-4931-1	1 each	219.85
159275	MOLECULAR ASPECTS OF ANTICANCER DRUG-DNA INTERACTIONS, Vol. I Stephen Neidle and Michael Waring (Eds.), CRC Press, Boca Raton, FL, 1993, 368 pages. This cutting-edge book surveys the current knowledge on the mode of action of the major classes of DNA-interactive antitumor agents. ISBN 0-8493-7770-6	1 each	112.30
198847	MOLECULAR BACTERIOLOGY Woodford, Neil and Johnson, Alan (Eds.), Humana Press, Totowa, NJ, 1998, 692 pages. A state-of-the-art collection of detailed molecular methods for the diagnosis and clinical investigation of bacterial infections. An accompanying series of minireviews highlights and explains the clinical and epidemiological relevance of the techniques and shows how they may be applied to major pathogen species and various types of antibiotic resistance. ISBN 0-89603-498-4	1 each	104.45
194353	MOLECULAR BIOLOGY AND BIOTECHNOLOGY: A Comprehensive Desk Reference Meyers, R.A. (Ed.), VCH Publishers, New York, NY, 1995, 1,000 pages, soft bound. A comprehensive, easy-to-use, illustrated reference on the theories and applications of molecular biology. It features more than 250 articles with principles and references. Of the 378 eminent contributors, eight are Nobel laureates. ISBN 0-471-18634-1	1 each	110.20

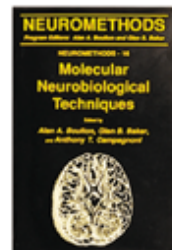

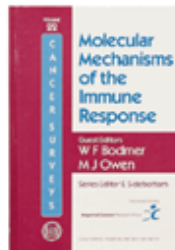

Books

194302	<p>MOLECULAR BIOLOGY: Current Innovations and Future Trends, Vol. 1 Griffin, A.M. and Griffin, H.G. (Eds.), Horizon Scientific Press, Norfolk, England, 162 pages. This volume describes current advances in molecular biology methods including PCR sequencing, capillary IEF, pulsed-field gel electrophoresis, and subtractive hybridization. ISBN 1-898486-01-8</p>	1 each	44.05	198625	<p>HYPERCELL 1998 Williams, G., Garland Publishing, 1997. This CD-Rom is an electronic addition to the Molecular Biology of the Cell. Color animations make learning cell biology more intuitive. System Requirements: PC/Windows: Windows 3.1 SVGA display, 26 MB disk space Macintosh: Color Macintosh, System 7 or higher, 25 MB disk space ISBN 0-81532-898-2</p>	1 each	52.45
159247	<p>MOLECULAR BIOLOGY OF BACTERIAL INFECTION C. Hormaeche, C.W. Penn and C.J. Smythe (Eds.), Cambridge University Press, New York, NY, 1992, 343 pages, hard bound. This book presents an authoritative account of the contributions being made by molecular genetics in uncovering the molecular basis of bacterial infections. ISBN 43298-7</p>	1 each	127.30	194330	<p>MOLECULAR BIOLOGY OF THE GENE, 4th Edition, Vol. 1 and 2 Watson, J.D., Hopkins, H.H., Roberts, J.W., Steitz, J.A. and Weiner, A.M. (Eds.), Benjamin/Cummings, Menlo Park, CA, 1987, 1,189 pages, hard bound. A comprehensive text describing the functions and structure of eukaryotic and prokaryotic cells. It discusses recombinant DNA methods and yeast molecular biology aspects, as well as, specialized gene aspects underlying multicellular existence. ISBN 0-8053-9614-4</p>	1 each	71.10
198844	<p>THE MOLECULAR BIOLOGY OF B-CELL AND T-CELL DEVELOPMENT Monroe, John, G. and Rolnheng, Ellen (Eds.), Humana Press, Totowa Press, 1998, 608 pages, case bound. This cutting-edge review of the current status of research on the early development of lymphocytes emphasizes molecular mechanisms controlling lineage commitment and selection. ISBN 0-89603-536-0</p>	1 each	183.75	159277	<p>MOLECULAR BIOLOGY OF THE HEPATITIS B VIRUS Alan McLachlan, CRC Press, Boca Raton, FL, 1991, 330 pages. Some of the topics include animal model systems, sequence data on the hepadnavirus genomes, hepadnavirus replication and analysis of the various HBV gene products. ISBN 0-8493-5516-8</p>	1 each	246.60
194472	<p>MOLECULAR BIOLOGY OF THE CELL, 3rd Edition Alberts, B., Bray, D., Lewis, J., Raff, M., Roberts, K. and Watson, J.D. (Eds.), Garland Publishing, New York, NY, 1994, 1,294 pages, hard bound. This text encompasses numerous topics including current advances in signal transduction, intracellular protein sorting, gene regulation, control of cell division, and developmental biology. Additionally, it includes discussions on plant and nervous system biology. ISBN 0-8153-1619-4</p>	1 each	84.00	159479	<p>MOLECULAR BIOTECHNOLOGY: Principles and Applications of Recombinant DNA Bernard R. Glick and Jack J. Pasternak (Eds.), ASM Press, Washington, DC, 1994, 500 pages, soft bound. This text covers the basic scientific principles and the wide-ranging industrial, agricultural, pharmaceutical, and biomedical applications of recombinant DNA technology. ISBN 1-55581-071-3</p>	1 each	49.70

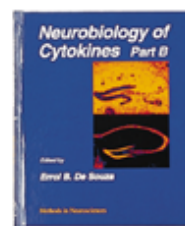

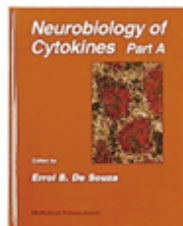

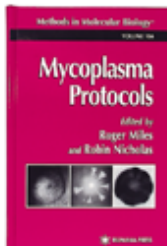

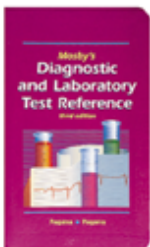

Books

198626	MOLECULAR CELL BIOLOGY, 3rd Edition Darnell, J. Jr., Lodish, H. and Baltimore, D., W.H. Freeman and Co., New York, NY, 1995, 1,105 pages, hard bound. This text provides an easy-to-follow understanding of the relationship of cell biology, genetics and biochemistry and their roles in molecular biology. ISBN 0-71672-380-8	1 each	79.75	198714	MOLECULAR GENETICS OF BACTERIA Synder, L. and Champness, W., ASM Press, Herndon, VA, 1997, 504 pages, hardbound. This comprehensive text details bacterial and microbial genetics from experimental methods through current applications of molecular genetics in biotechnology. ISBN 1-55581-102-7	1 each	83.95
158393	MOLECULAR CLONING: A Laboratory Manual, 2nd Edition J. Sambrook, E.F. Fritsch and T. Maniatis, Editors, CSHL Press, Cold Spring Harbor, 1989, 1659 pages, comb bound. This set of three books covers topics previously included in the first edition with the addition of new chapters, such as oligonucleotide probes and mutagenesis, <i>in vitro</i> amplification by PCR technology, and expression of cloned genes. ISBN 0-87969-309-6	1 set	156.30	194415	MOLECULAR GENETICS OF CANCER: Cold Spring Harbor Symposia on Quantitative Biology, Vol. LIX Stillman, B. (Ed.), Cold Spring Harbor Press, Cold Spring Harbor, NY, 1994, 732 pages, soft bound. A comprehensive presentation covering the material discussed at the 1994 CSH symposium. Control of the cell cycle and cell growth and apoptosis are some of the topics discussed. Others include cancer genes in humans and genetic therapies. ISBN 0-87969-068-2	1 each	109.15
195028	MOLECULAR DIAGNOSIS OF CANCER Cotter, F.E. (Ed.), Humana Press, Totowa, NJ, 1996, 232 pages, hard bound. Leading researchers and clinicians provide a comprehensive guide to current and essential molecular techniques-particularly PCR- for diagnosing and monitoring hematological and solid tumors. Topics discussed include PCR, FISH, CGH, and southern analysis, sequencing, and SSCP to detect minimal disease and apoptosis. ISBN 0-89603-341-4	1 each	76.60	194422	MOLECULAR IMAGING IN NEUROSCIENCES: A Practical Approach Sharif, N.A. (Ed.), IRL Press at Oxford University Press, Oxford, England, 1993, 245 pages, soft bound. A collection of protocols for imaging neurotransmitter and receptor mRNAs employing radioactive and non-radioactive <i>in situ</i> hybridization technology. Some specific areas addresses are visualizing transmitter and drug receptors using quantitative autoradiography, sequence-specific antibodies, and immunocytochemistry. ISBN 0-19-963380-0	1 each	43.00
198862	MOLECULAR DIAGNOSIS OF INFECTIOUS DISEASES Reischl, Udo (Ed.), Humana Press, Totowa, NJ, 1997, 648 pages, case bound. A comprehensive and up-to-date set of basic and advanced methods that illuminates the principles of molecular diagnostics and allows researchers to establish assay systems tailored to their specific needs. ISBN 0-89603-485-2	1 each	124.95	198659	MOLECULAR IMMUNOLOGY, 2nd Edition Hames, B.D. and Glover, D.M. (Eds.), IRL Press at Oxford University Press, Oxford, UK, 1996, 386 pages, soft bound. This edition provides up-to-date information about the molecular biology of the immune system. New subjects include Ig gene rearrangements, MHC antigens, B-cell activation and major histocompatibility complex genes. ISBN 0-19-963378-9	1 each	63.00

Books

194459	<p>CANCER SURVEY #22 MOLECULAR MECHANISMS OF THE IMMUNE RESPONSE Bodmer, W.F. and Owen, M.J. (Eds.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1994, 119 pages, hard bound. Some of the topics covered include the evolution and function of the HLA region, the recognition of viral antigens at the cell surface, T-lymphocyte activation, and the control of T-cell development by non-receptor protein tyrosine kinases. ISBN 0-87996-442-4</p>	1 each	82.70	159314	<p>MOLECULAR PLANT PATHOLOGY, Vol. I and II S.J. Gurr, M.J. McPherson, and D.J. Bowles (Eds.), Oxford University Press, Oxford, UK, 1993, 470 pages, soft bound. These two volumes provide the first comprehensive guide to the latest molecular techniques. ISBN 0-19-963353-3</p>	1 each	98.40
194513	<p>MOLECULAR METHODS FOR VIRUS DETECTION Wiedbrauk, D.L. and Farkas, D.H. (Eds.), Academic Press, San Diego, CA, 1995, 354 pages, wire bound. This text describes protocols for viral detection, as well as, mycobacterial nucleic acid sequence detection in clinical samples. Current PCR techniques are discussed along with 3SR, NASBA, LCR, SDA, and LAT. ISBN 0-12-748920-7</p>	1 each	66.10	159278	<p>MOLECULAR STRUCTURE AND LIFE Yoshimasa Kyogoku and Yoshitumi Nishimura (Eds.), CRC Press, Boca Raton, FL, 1993, 289 pages. Areas covered are: DNA structure and curvature, DNA binding proteins and their interactions, and molecular structure in gene regulation. ISBN 0-8493-7768-4</p>	1 each	80.95
158407	<p>MOLECULAR NEUROBIOLOGICAL TECHNIQUES A.A. Boulton, G.B. Baker and A.T. Campagnoni, Editors, Humana Press, Clifton, NJ, 1989, 295 p., hard bound. This volume explores the principles and techniques of molecular biology that have had so great an impact on current investigations into the structure and function of the nervous system. ISBN 0-89603-140-3</p>	1 each	80.75	159370	<p>MONOCLONAL ANTIBODIES J. H. Peters and H. Baumgarten (Eds.), Springer-Verlag, NY, 1992, 488 pages, hard bound. A "cook book" offering hints and protocols focused on those areas which usually cause most of the problems for newcomers, i.e., immunization, cell culture, animal care, and mass production of antibodies. ISBN 0-387-50843-0</p>	1 each	79.85
159304	<p>THE MOLECULAR PATHOLOGY OF AUTOIMMUNE DISEASE Constantin A. Bona, et.al. (Eds.), Harwood Academic, New York, 1993, 800 pages, hard bound. This comprehensive book explores the molecular pathology of autoimmune diseases. ISBN 3-7186-0555-4</p>	1 each	202.60	159394	<p>MONOCLONAL ANTIBODY AND IMMUNOSENSOR TECHNOLOGY: Laboratory Techniques in Biochemistry and Molecular Biology Campbell, A.M. (Ed.), Elsevier Science Publishers, Amsterdam, The Netherlands, 1991, 427 pages, soft bound. This book presents modern techniques and current information pertaining to the production of monoclonal antibodies and related materials. It succeeds "Monoclonal Antibody Technology" published in 1984. ISBN 0-444-81412-4</p>	1 each	72.50

Books

198845	MYCOPLASMA PROTOCOLS Miles, Roger, J. and Nicholas, Robin, A.J. (Eds.), Humana Press, Totowa, NJ, 1998, 336 pages, case bound. A collection of cutting-edge mycoplasma methods for the detection, isolation, identification, characterization and genetic manipulation of the pathogenic mycoplasmas. These step-by-step methods are crafted for successful reproducibility and include biochemical, genetic and molecular techniques essential to understanding pathogenicity and adhesion to host cells. ISBN 0-89603-525-5	1 each	83.45	198831	NATURAL PRODUCTS ISOLATION Cannell, Richard, J.P. (Ed.), Human Press, Totowa, NJ, 1998, 400 pages, hard bound. This volume presents techniques for the extraction and purification of natural products from all biological sources. It elucidates all of the relevant techniques and issues addressed by researchers involved in the extraction and purification of natural products. ISBN 0-89603-362-7	1 each	99.95
159280	NATURAL AUTOANTIBODIES Yehuda Shoenfeld and David A. Isenberg, CRC Press, Boca Raton, FL, 1993, 368 pages. This book provides a thorough review of the field on natural autoantibodies. ISBN 0-8493-5501-X	1 each	229.95	198660	NEURAL CELL CULTURE: A PRACTICAL APPROACH Cohen, J. and Wilken, G., (Eds.), IRL Press at Oxford University Press, Oxford, UK, 1996, 272 pages, soft bound. Cell Culture research has provided important breakthroughs in neural processes at the cellular and molecular levels. Methods for preparing cultures from a variety of neural tissues are presented. Illustrated dissection guides, methods for enriching distinct cell types and optimization of viability and growth are also featured. ISBN 0-19-963484-X	1 each	57.75
194393	THE NATURAL IMMUNE SYSTEM: Humoral Factors Sim, E. (Ed.), Oxford University Press, Oxford, England, 1993, 392 pages, soft bound. An overview of humoral factors and their involvement in infection response, disease and injury. It details all soluble components released in response to injury or infection. ISBN 0-19-963336-3	1 each	51.75	194388	NEUROPEPTIDE GENE EXPRESSION Turner, A.J., Stephenson, F.A. (Eds.), Portland Press, London, England, 1994, 248 pages, hard bound. The first volume of the "Frontiers in Neurobiology" series addressing current advances in the identification of neuropeptides and their regulating factors of expression. ISBN 1-85578-044-5	1 each	85.40
194489	NATURAL PRODUCTS: A Laboratory Guide, 2nd Edition Ikan, R. (Ed.), Academic Press, San Diego, CA, 1991, 360 pages, hard bound. A practical guide to methods of isolation, synthesis, and analytical data of natural products. ISBN -12-340551-7	1 each	65.00	159353	NEUROTROPHIC FACTORS: Neuromethods, Vol. 25 Alan A. Boulton, Glen B. Baker, and Franz Hefti (Eds.), Humana Press, Totowa, NJ, 1993, 440 pages. Leading researchers present those techniques that have been crucial in propelling the neurotrophic factors field to its current state of high visibility. ISBN 0-89603-249-3	1 each	126.00
