

Books

198845	<p>MYCOPLASMA PROTOCOLS Miles, Roger, J. and Nicholas, Robin, A.J. (Eds.), Humana Press, Totowa, NJ, 1998, 336 pages, case bound. A collection of cutting-edge mycoplasma methods for the detection, isolation, identification, characterization and genetic manipulation of the pathogenic mycoplasmas. These step-by-step methods are crafted for successful reproducibility and include biochemical, genetic and molecular techniques essential to understanding pathogenicity and adhesion to host cells. ISBN 0-89603-525-5</p>	1 each	83.45	198831	<p>NATURAL PRODUCTS ISOLATION Cannell, Richard, J.P. (Ed.), Human Press, Totowa, NJ, 1998, 400 pages, hard bound. This volume presents techniques for the extraction and purification of natural products from all biological sources. It elucidates all of the relevant techniques and issues addressed by researchers involved in the extraction and purification of natural products. ISBN 0-89603-362-7</p>	1 each	99.95
159280	<p>NATURAL AUTOANTIBODIES Yehuda Shoenfeld and David A. Isenberg, CRC Press, Boca Raton, FL, 1993, 368 pages. This book provides a thorough review of the field on natural autoantibodies. ISBN 0-8493-5501-X</p>	1 each	229.95	198660	<p>NEURAL CELL CULTURE: A PRACTICAL APPROACH Cohen, J. and Wilken, G., (Eds.), IRL Press at Oxford University Press, Oxford, UK, 1996, 272 pages, soft bound. Cell Culture research has provided important breakthroughs in neural processes at the cellular and molecular levels. Methods for preparing cultures from a variety of neural tissues are presented. Illustrated dissection guides, methods for enriching distinct cell types and optimization of viability and growth are also featured. ISBN 0-19-963484-X</p>	1 each	57.75
194393	<p>THE NATURAL IMMUNE SYSTEM: Humoral Factors Sim, E. (Ed.), Oxford University Press, Oxford, England, 1993, 392 pages, soft bound. An overview of humoral factors and their involvement in infection response, disease and injury. It details all soluble components released in response to injury or infection. ISBN 0-19-963336-3</p>	1 each	51.75	194388	<p>NEUROPEPTIDE GENE EXPRESSION Turner, A.J., Stephenson, F.A. (Eds.), Portland Press, London, England, 1994, 248 pages, hard bound. The first volume of the "Frontiers in Neurobiology" series addressing current advances in the identification of neuropeptides and their regulating factors of expression. ISBN 1-85578-044-5</p>	1 each	85.40
194489	<p>NATURAL PRODUCTS: A Laboratory Guide, 2nd Edition Ikan, R. (Ed.), Academic Press, San Diego, CA, 1991, 360 pages, hard bound. A practical guide to methods of isolation, synthesis, and analytical data of natural products. ISBN -12-340551-7</p>	1 each	65.00	159353	<p>NEUROTROPHIC FACTORS: Neuromethods, Vol. 25 Alan A. Boulton, Glen B. Baker, and Franz Hefti (Eds.), Humana Press, Totowa, NJ, 1993, 440 pages. Leading researchers present those techniques that have been crucial in propelling the neurotrophic factors field to its current state of high visibility. ISBN 0-89603-249-3</p>	1 each	126.00

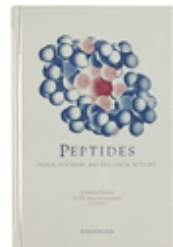

Books

159281	<p>NEUROVASCULAR IMMUNOLOGY Thomas C. Moore, CRC Press, Boca Raton, FL, 1993, 480 pages. This volume provides an in-depth exploration of the neurovascular branch of the neuro-immune axis. ISBN 0-8493-6894-4</p>	1 each	208.95
198858	<p>NITRIC OXIDE PROTOCOLS Titheradge, Michael A. (Ed.), Humana Press, Totowa, NJ, 1997, 336 pages, case bound. Michael Titheradge provides both the experienced research and the newcomer with time-tested techniques to cover all aspects of NO Synthase and metabolism. ISBN 0-89603-470-4</p>	1 each	104.50
198628	<p>NEW METHODS IN PEPTIDE MAPPING FOR THE CHARACTERIZATION OF PROTEINS Hancock, W.S.(Ed.), CRC Press, Inc., Boca Raton, FL, 1996, 246 pages, hard bound. This text presents the newest procedures for characterizing recombinant DNA-derived proteins by peptide mapping. Some techniques discussed are capillary electrophoresis, analysis of glycopeptides and the use of electrospray and matrix assisted laser desorption mass spectrometry. ISBN 0-84937-822-2</p>	1 each	115.50
159283	<p>NMR OF PROTEINS G.M. Clore and A.M. Gronenborn (Eds.), CRC Press, Boca Raton, FL, 1993, 336 pages. This reference represents the most comprehensive and up-to-date collection of biological NMR literature. ISBN 0-8493-7771-4</p>	1 each	125.95
198637	<p>NINETEENTH SYMPOSIUM ON BIOTECHNOLOGY FOR FUELS AND CHEMICALS Finkelstein, Mary and Davison, Brian H. (Eds.), Humana Press, Totowa, NJ, 1998, 800 pages, hard bound. This text, based on the 19th Symposium, held in Colorado Springs, CO, May 4-8, 1997, leading researchers from academia, industry and government present their new applications and cutting-edge research advances in the production of fuels and chemicals through biotechnology. ISBN 0-89603-651-0</p>	1 each	194.25
194357	<p>NUCLEASES, 2nd Edition Roberts, R.J., Linn, S.M. and Lloyd, R.S. (Eds.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1993, 499 pages, hard bound. An updated volume featuring a review of all classes of nucleases and their function and biological significance. It is a valuable reference for individuals involved in DNA replication, DNA recombination, DNA repair, and RNA processing. ISBN 0-87969-426-2</p>	1 each	86.85
198661	<p>NON-ISOTOPIC METHODS IN MOLECULAR BIOLOGY: A Practical Approach Levy, E.R. and Herrington, C.S., IRL Press at Oxford University Press, Oxford, UK, 1995, 256 pages, soft bound. This text describes how non-radioactive chemicals can be used to provide detailed molecular analyses of DNA and RNA with equivalent or superior results when compared with current radioactive methods. ISBN 0-19-963455-6</p>	1 each	57.75

Books

198629	<p>NUCLEIC ACID ANALYSIS: Principles and Bioapplications Dangler, C.A. (Ed.), Wiley-Liss, New York, 1996, 284 pages, hard bound. This complete text is separated into two sections: Methods and Applications. Hybridization assays, cloning, labeling probes and amplifying probe signals are discussed in the methods section. Forensic applications, screening for genetic diseases, infectious disease diagnosis and applications to food technology and environmental science are topics discussed in the applications section. ISBN 0-47110-358-6</p>	1 each	94.45	194345	<p>OFFICIAL METHODS OF ANALYSIS OF AOAC INTERNATIONAL, 16th Edition Cunniff, P.A. (Ed.), AOAC International, Arlington, VA, 1995, 2,000 pages. A two volume set presenting over 2,100 collaborative chemical and biological methods. Some topics of discussion include ELISA, microbiological chemical assays, and methods of combustion for nitrogen analysis. Every procedure provides a locator number, cautionary notes, a statement of applicability, supplier addresses, CAS number, and reference to published studies.</p>	1 set	512.65
194354	<p>NUCLEIC ACID BLOTTING: The Basics Brickell, P.M. and Darling, D. (Eds.), IRL Press at Oxford University Press, Oxford, England, 1994, 128 pages, soft bound. A general reference guide detailing the pitfalls and errors of modern molecular biology techniques. It describes southern, northern, and dot/slot transfer methods, as well as, trouble-shooting procedures and problem solving advice. ISBN 0-19-963446-7</p>	1 each	19.80	159315	<p>OLIGONUCLEOTIDES AND ANALOGUES: A Practical Approach Fritz Eckstein (Ed.), Oxford University Press, Oxford, UK, 1992, 340 pages, soft bound. This volume provides practical guidance on oligonucleotide synthesis and methods for introducing modifications into these molecules. ISBN 0-19-963444-0</p>	1 each	50.90
198662	<p>NUCLEIC ACIDS IN CHEMISTRY AND BIOLOGY, 2nd Edition Blackburn, G.M. and Gait, M.J. (Eds.), IRL Press at Oxford University Press, Oxford, UK, 1996, 528 pages, soft bound. This text describes nucleic acids and how they relate to modern advances in structural biology, RNA enzymology, drug discovery and biotechnology. OSBM 0-19-963533-1</p>	1 each	52.45	158356	<p>ONCOGENES G. Cooper, Jones & Bartlett Publishers, Boston Mass. 1990, 200 pages, soft bound. This book provides an introduction and broad overview of the oncogene field. It contains chapters on recessive oncogenes, nuclear oncogenes, and novel oncogene function. ISBN 0-86720-136-3</p>	1 each	63.70
194373	<p>NUCLEIC ACIDS SEQUENCING: A Practical Approach Howe, C.J. and Ward, E.S. (Eds.), IRL Press at Oxford University Press, Oxford, England, 1989, 241 pages, soft bound. A publication for both beginning and experienced researchers describing modern nucleic acid sequencing techniques. ISBN 0-19-963057-7</p>	1 each	48.50	158398	<p>ONCOGENES D.M. Glover and B.D. Hames, Editors, IRL Press at Oxford University Press This book reviews the most recent developments in oncogenic transformation. Topics include: the involvement of oncogenic DNA tumor viruses in cellular protein interactions, the molecular pathology of chromosomal abnormalities and cancer genes in human tumors, and more. ISBN 0-19-963035-6</p>	1 each	43.35

Books

159286	ONCOGENES, 2nd Edition, Vol. I Enrique Pimentel, CRC Press, Boca Raton, FL, 1989, 450 pages. This edition updates the information on the different topics discussed in the first edition. ISBN 0-8493-6505-8	1 each	239.60	194350	PCR: A Practical Approach McPherson, M.J., Quirke, P. and Taylor, G.R. (Eds.), IRL Press, Oxford, England, 1991, 253 pages, soft bound. This book details gene analysis at the area of restriction fragment polymorphism, sequence analysis, and point mutation. Techniques employing different source materials such as cloned DNA, genomic DNA, RNA, and PCR products themselves are presented. ISBN 0-19-963196-4	1 each	43.00
158391	ONCOGENES AND MOLECULAR ORIGINS OF CANCER Robert A. Weinberg, Editor, CSHL Press, Cold Spring Harbor, 1991, 367 pages, soft bound. This publication provides an introduction to the rapidly growing field of oncogene research. Each chapter is written by a leader in the field and explains the concepts that fuel current work such as cytoplasmic and nuclear oncoproteins, signal transducing mechanisms, growth factors and more. ISBN 0-87979-340-1	1 each	78.10	198828	PCR IN BIOANALYSIS Meltzer, Stephen, J. (Ed.), Humana Press, Totowa, NJ, 292 pages, hard bound. This text offers powerful PCR-based protocols and assays in actual use or potential use in clinical medicine and commercial biology. The main focus of the book is on the commercial applications of PCR, as opposed to basic research uses. ISBN 0-89603-497-6	1 each	72.95
198716	ORGANIC CHEMISTRY Schmid, G.H., McGraw Hill, New York, NY, 1995, 1208 pages, hard bound. This text is written to introduce students to organic structures, reactions and mechanisms. Organic reaction mechanisms are described for biological systems, spectroscopy and stereochemical ideas are introduced early and reinforced throughout the text. ISBN 0-801674-90-5	1 each	98.55	194342	PCR PRIMER: A Laboratory Manual Diefenbach, C. (Ed.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1995, 350 pages, soft bound. A text covering all aspects of PCR and other amplification techniques including fundamentals to advanced procedures. Each procedure describes analytical methods and troubleshooting solutions. ISBN 0-87969-448-3	1 each	88.20
159288	ORIGIN, EVOLUTION, AND SPREAD OF ANTIBIOTIC RESISTANCE GENES Carlos F. Amabile-Cuevas, CRC Press, Boca Raton, FL, 1994, 116 pages. This book discusses the nature, origin, and dispersion of bacterial resistance to antimicrobial drugs. ISBN 1-57059-001-X	1 each	104.10	158402	PCR PROTOCOLS: A Guide To Methods and Applications Michael A. Innis, David H. Gelfand, John J. Sninsky and Thomas J. White, Editors, Academic Press, San Diego, CA, 1990, 482 pages, comb bound. Over 50 chapters provide precise instructions on procedures, from amplification and direct sequencing of genomic DNA through cDNA cloning and quantitation of mRNA. ISBN 0-12-372181-4	1 each	69.30
198842	OXFORD DICTIONARY OF BIOCHEMISTRY AND MOLECULAR BIOLOGY Smith, A.D., Datta, S.P. et al., Oxford University Press, Oxford, UK, 1997, 672 pages, soft bound. This important new volume provides a survey of current biochemistry and molecular biology in the form of a dictionary. It contains informative entries for more than 17,000 headwords. ISBN 854768-4	1 each	63.00	198737	PCR PROTOCOLS FOR EMERGING INFECTIOUS DISEASES Pershing, D.H. (Ed.), American Society for Microbiology, Washington, DC, 1996, 152 pages, comb bound. This text contains 12 detailed protocols to be used as examples when developing PCR protocols for new drug resistant pathogens.	1 each	38.55
