

Books

198824	PROTEIN TARGETING PROTOCOLS Clegg, Roger A. (Ed.), Humana Press, Totowa, NJ, 1998, 336 pages, hard bound. Expert researchers describe the key methods for detecting and analyzing proteins and protein motifs involved in targeting interactions, mostly from the perspective of intracellular signaling. The techniques include those designed to reveal the existence of targeting interactions and characterize their physico-chemical properties, to identify and isolate interacting proteins on the basis of the "bait-prey" principle, to target domains and to modify lipids.	1 each	104.50	198375	PROTOCOLS IN MOLECULAR NEUROBIOLOGY: Methods in Molecular Biology, Vol. 13 Alan Longstaff and Patricia Revest (Eds.), Humana Press, Totowa, NJ, 1992, 408 pages, comb bound. This book details 22 state-of-the-art protocols in molecular neuroscience. ISBN 0-89603-199-3	1 each	89.50
159371	PROTOCOLS FOR GENE ANALYSIS: Methods in Molecular Biology, Vol. 31 Adrian J. Harwood (Ed.), Humana Press, Totowa, NJ, 1994, 411 pages, comb bound. As the cloning of novel genes gets easier, their analysis becomes an even more pressing problem. This volume provides an up-to-date set of protocols for the analysis of cloned genes. ISBN 0-89603-258-2	1 each	74.65	194248	PULSED FIELD GEL ELECTROPHORESIS: A Practical Guide Birren, B. and Lai, E. (Eds.), Academic Press, San Diego, CA, 1993, 253 pages, soft bound. This book provides all pertinent information to conduct and understand pulsed field gel electrophoresis experiments based on the author's experience and teaching procedures. ISBN 0-12-101290-5	1 each	44.05
159360	PROTOCOLS FOR NUCLEIC ACID ANALYSIS BY NONRADIOACTIVE PROBES: Methods in Molecular Biology, Vol. 28 Peter G. Isaac (Ed.), Humana Press, Totowa, NJ, 1993, 280 pages, comb bound. An exceptionally useful collection of tried and tested protocols that avoid the use of radioisotopes for nucleic acid analysis. ISBN 0-89603-254-X	1 each	57.25	159355	PULSED-FIELD GEL ELECTROPHORESIS: Methods in Molecular Biology, Vol. 12 Margit Burmeister and Levy Ulanowsky (Eds.), Humana Press, Totowa, NJ, 1992, 488 pages. A series of step-by-step protocols useful to both the novice and expert. ISBN 0-89603-229-9	1 each	89.50
159372	PROTOCOLS FOR OLIGONUCLEOTIDES AND ANALOGS: Methods in Molecular Biology, Vol. 20 Sudhir Agrawal (Ed.), Humana Press, Totowa, NJ, 1993, 502, comb bound. In this volume, leading experts have contributed chapters offering information on the detailed chemistry of oligonucleotides and their analogs. Included are step-by-step protocols for their synthesis. ISBN 0-89603-247-7	1 each	76.60	198853	THE QUINOLONES, Second Edition Andriole, Vincent T. (Ed.), Academic Press, San Diego, CA, 1998, case bound. This text provides the most current review of quinolone antibacterial agents available and a look into new quinolone development. The book provides comprehensive and updated coverage of the history, chemistry, pharmacology, efficacy and safety aspects of quinolones. ISBN 0120595141	1 each	78.75

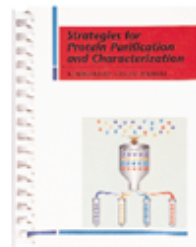

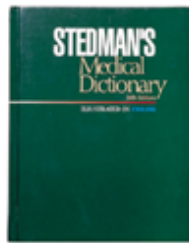

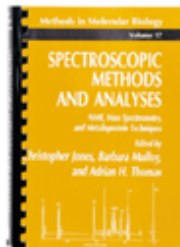

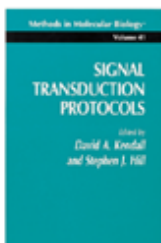

Books

158397	<p>RADIOISOTOPES IN BIOLOGY: A Practical Approach R.J. Slater, Editor, IRL Press at Oxford University Press, Oxford, UK, 1990, 305 pages, soft bound. This volume provides practical guidance for the safe and efficient use of radiochemicals. All of the essential features are covered like choice of isotope; and establishing a suitable working environment. ISBN 0-19-963081-X</p>	1 each	54.35
158437	<p>RADIOISOTOPIC METHODS FOR BIOLOGICAL AND MEDICAL RESEARCH Herman W. Knoche, Editor, IRL/OUP Press, Oxford, UK, 1991, 448 pages, soft bound. The focus of the book is on the topics listed on the U.S. Nuclear Regulatory Commission's license application: principles and practices of radiation protection; radioactivity measurement, standardization and monitoring techniques, etc. ISBN 505806-2</p>	1 each	51.20
194492	<p>RCRA REGULATIONS AND KEY WORD INDEX, 1994 Edition Elsevier Science, New York, NY, 1,108 pages, soft bound. A complete reference of the RCRA (Resource Conservation and Recovery Act) regulations as of December 1993. It contains a master index of all keywords. ISBN 1074-1364</p>	1 each	133.15
194464	<p>REAGENT CHEMICALS, 8th Edition American Chemical Society, Washington, DC, 1992, 806 pages. A valued reference to the procedures and specifications for ACS certification. ISBN 0-8412-2502-8</p>	1 each	165.30
194448	<p>RECOMBINANT DNA, 2nd Edition Watson, J.D., Gilman, M., Witkowski, J. and Zoller, M. (Eds.), Scientific American Books, New York, NY, 1992, 626 pages, soft bound. Current recombinant DNA techniques in biology has revolutionized the understanding of living organisms. This book demonstrates how this technology has resulted in an explosion of available knowledge and fundamental principles. 0-7167-2282-8</p>	1 each	56.65
194282	<p>RECOMBINANT DNA LABORATORY MANUAL Zyskind, J.W. and Bernstein, S.I. (Ed.), Academic Press, San Diego, CA, 1992, 224 pages, soft bound. This book is presented as a working manual for individuals with limited experience in manipulating DNA molecules. Furthermore, the methods discussed are helpful to veteran researchers entering this area of research. ISBN 0-12-784401-5</p>	1 each	35.80
198860	<p>RECOMBINANT PROTEINS FROM PLANTS Cunningham, Charles and Porter, Andrew, J.R. (Eds.), Humana Press, Totowa, NJ, 1997, 328 pages, case bound. This authoritative collection of basic and advanced protocols permits biotechnologists to use plants rather than single cell fermentation systems for expressing recombinant proteins. The protocols provide clear step-by-step instructions for the cloning, expression and analysis of a wide variety of recombinant proteins in plants and for the cloning of genes into a number of different plant species. ISBN 0-89603-390-2</p>	1 each	83.45

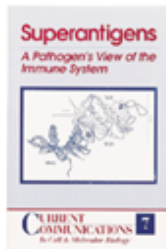

Books

159293	REGULATION OF HUMAN CANCER BY CYTOKINES: Present Status and Future Prospects Fumimaro Takaku and Takeshi Ogura (Eds.), CRC Press, Boca Raton, FL, 1993, 180 pages. This book considers clinical problems associated with new modalities of cancer treatment involving recombinant cytokines. ISBN 0-8493-7747-1	1 each	83.35	159294	RNA POLYMERASE III TRANSCRIPTION Robert J. White, CRC Press, Boca Raton, FL, 1994, 118 pages. This new book investigates the molecules involved in gene transcription by RNA polymerase III (pol III). ISBN 1-57059-046-X	1 each	104.10
198823	RETINOID PROTOCOLS Redfern, Christopher (Ed.), Humana Press, Totowa, NJ, 1998, 456 pages, hard bound. A comprehensive collection of state-of-the-art biochemical and molecular methods for retinoid research. ISBN 0-89603-438-0	1 each	83.45	194259	RNA PROCESSING, Vol. 1: A Practical Approach Higgins, S.J. and Hames, B.D. (Eds.), IRL Press at Oxford University Press, Oxford, England, 1994, 278 pages, soft bound. The first part of a two volume set that details current protocols from leading laboratories of RNA research with clear outlines and explanations of the key steps required for successful investigations. ISBN 0-19-1963343-6	1 each	43.00
198826	RNA ISOLATION AND CHARACTERIZATION PROTOCOLS Rapley, Ralph and Manning, David L. (Eds.), Humana Press, Totowa, NJ, 1998, 275 pages, hard bound. Innovative biological investigators offer a powerful and highly useful collection of up-to-date methods for the isolation of RNA from a variety of sources, including bacterial, plant and mammalian cells. These fine-tuned protocols take both the experienced and inexperienced investigator through the nuances of RNA manipulation, from extraction to in vitro translation. ISBN 0-89603-494-1	1 each	104.50	194258	RNA PROCESSING, Vol. 2: A Practical Approach Higgins, S.J. and Hames, B.D. (Eds.), IRL Press at Oxford University Press, Oxford, England, 1994, 278 pages, soft bound. This volume continues where volume one ends providing current protocol information on RNA research. ISBN 0-19-963470-X	1 each	52.50
198852	RNA METHODOLOGIES, Second Edition Farrell, Robert E. Jr. (Ed.), Academic Press, San Diego, CA, 1998. This laboratory guide is a collection of tested and optimized laboratory protocols for the isolation and characterization of eukaryotic RNA. This edition includes a variety of RNA-based PCR techniques, such as differential display PCR techniques, such as differential display PCR and transcript quantification by competitive (mimic) PCR. ISBN 0122496957	1 each	65.00	159250	THE RNA WORLD Raymond F. Gesteland and John F. Atkins (Eds.), Cold Spring Harbor Press, Plainview, NY, 1993, 632 pages, hard bound. This unique book is an exploration of the RNA world: its present, past, and potential. ISBN 0-87969-380-0	1 each	110.00
				194222	SCIENTIFIC PHOTOMACROGRAPHY Bracegirdle, B. (Ed.), Bios Scientific Publications, Oxford, England, 1995, 120 pages, soft bound. A practical guide describing the correct equipment and methods needed for both transmitted and reflected light photography of scientific specimens. It is ideal for all individuals who desire to produce high quality photographs on a regular basis. ISBN 1-872748-49-X	1 each	38.55

Books

194257	SEQUENCE ANALYSIS PRIMER Gribskow, M. and Devereux, J. (Eds.), W.H. Freeman and Co., New York, NY, 1991, 279 pages, soft cover. A comprehensive guide which is intended to aid researchers in understanding and implementing computer programs used for analyzing new sequences. It provides insight on solving problems and pitfalls often confronted by individuals using sequence analysis software. ISBN 0-19-509876-9	1 each	57.75	198840	SPECTRAL PROPERTIES OF LIPIDS Hamilton, Richard J. and Cast, John (Eds.), CRC Press, Boca Raton, FL, 1998, 320 pages, hard bound. This book provides an overview of lipid spectroscopy at the professional and reference levels. Topics include high resolution NMR, theory and application of infra-red spectroscopy and colorimetry. ISBN 0-8943-9736-7	1 each	136.50
159362	A SHORT COURSE IN BACTERIAL GENETICS Jeffrey H. Miller, CSHL Press, Cold Spring Harbor, 1992, 456 pages, plus handbook, comb bound and soft. A laboratory manual and handbook for <i>Escherichia coli</i> and related bacteria. This set is intended for students, research workers, and instructors. ISBN 0-87969-349-5	1 each	127.30	194435	SPECTROSCOPIC METHODS AND ANALYSIS Jones, C., Mulloy, B. and Thomas, A.H., Humana Press, Totowa, NJ, 1993, 395 pages, soft bound. A comprehensive guide to spectroscopic techniques with emphasis on the practical aspects like sample size and purity limitations. Other areas addressed include the advantages of using this method of analysis and reading results. ISBN 0-89603-215-9	1 each	76.60
198631	SHORT PROTOCOLS IN MOLECULAR BIOLOGY, 3rd Edition Ausubel, F.M., et al., John Wiley & Sons, Inc., New York, NY, 1995, 850 pages, spiral bound. This volume provides step-by-step protocols for over 200 of the latest molecular biology techniques, including a new chapter on protein phosphorylation. ISBN 0-47113-781-2	1 each	140.00	194483	STAINING PROCEDURES, 4th Edition Clark, G. (Ed.), Williams and Wilkins, Baltimore, MD, 1981, 512 pages, soft bound. This book covers current staining procedures as they are described by the Biological Stain Commission. It is a prominent and respected source of information on stains and techniques. ISBN 0-683-01707-1	1 each	53.45
159326	SIGNAL TRANSDUCTION: A Practical Approach G. Milligan (Ed.), Oxford University Press, Oxford, UK, 1992, 208 pages, soft bound. An excellent reference on all aspects of signal transduction. ISBN 0-19-963295-2	1 each	52.10	198632	STEALTH LIPOSOMES Lasic, D. and Martin, F., CRC Press, Inc. Boca Raton, FL, 1995, 289 pages, hard bound. This text describes stealth liposomes and how they relate to theoretical polymer physics, organic synthesis, colloid science and biology. Topics discussed: theory, chemistry, biochemistry, pharmacology, preclinical studies and medical applications in humans. ISBN 0-84938-383-8	1 each	156.45
194428	SIGNAL TRANSDUCTION PROTOCOLS: Methods in Molecular Biology, Vol. 41 Kendall, D.A. and Hill, S.J. (Eds.), Humana Press, Totowa, NJ, 1995, 305 pages, comb bound. An introduction to methods of studying receptor-mediated cell signaling. This "hands-on" approach emphasizes G-protein receptors, radioligand binding and autoradiography techniques. ISBN 0-89603-298-1	1 each	82.00				

One call. One source.

Books

194412	STEDMAN'S MEDICAL DICTIONARY, 26th Edition Williams and Wilkins, Baltimore, MD, 1995, 2,225 pages. A full color, illustrated dictionary featuring 12,000 new terms. Each of the sections have been modernized and made easier to use. ISBN 0-683-07922-0	1 each	49.55	159341	SYNTHETIC PEPTIDES: A User's Guide Gregory A. Grant (Ed.), W. H. Freeman and Co., New York, NY, 1992, 382 pages, soft bound. A resource book for those involved in designing, manufacturing, and handling synthetic peptides. ISBN 0-7167-7009-1	1 each	52.10
198633	STRATEGIES FOR PROTEIN PURIFICATION AND CHARACTERIZATION: A Laboratory Course Manual marshak, D.R., et.al., Cold Spring Harbor Laboratory Press, Cold Spring Harbor, NY, 1996, 396 pages, comb bound. This text details how to perform the major protein techniques by applying them to four different types of molecules. They include a regulatory protein, a DNA-binding protein, a membrane-bound receptor and a recombinant protein. Bulk fractionation, chromatographic and electrophoretic techniques are included. ISBN 0-87969-385-1	1 each	89.25	194402	TECHNIQUES IN FREE RADICAL RESEARCH: Laboratory Techniques in Biochemistry and Molecular Biology Rice-Evans, C.A., Diplock, A.T. and Symons, M.C.R. (Eds.), Elsevier Science Publishers, Amsterdam, The Netherlands, 1991, 291 pages, soft bound. This book discusses the topic of ESR and the direct detection of radicals and the involvement of spin-trapping agents. It presents the most relevant, appropriate, and error-less methods and techniques currently available. ISBN 0-444-81314-4	1 each	53.75
159295	STRUCTURE OF ANTIGENS, Vol. I M.H.V. Van Regenmortel (Ed.), CRC Press, Boca Raton, FL, 1992, 415 pages. A useful reference on the structure of antigens and their interactions with antibodies. ISBN 0-8493-8865-1	1 each	178.30	158543	TECHNIQUES IN HIV RESEARCH Anna Aldovini and Bruce Walker, Editors, Oxford University Press, 1990, 288 pages, spiral bound. <i>"Should be handy to almost anyone working on HIV. The techniques and methods are clearly presented....this book will certainly join the series of some laboratory manual classics."</i> -CELL ISBN 0-935859-88-8	1 each	66.25
159296	STRUCTURE OF ANTIGENS, Vol. II M.H.V. Van Regenmortel (Ed.), CRC Press, Boca Raton, FL, 1992, 336 pages. A useful reference on the structure of antigens and their interactions with antibodies. ISBN 0-8493-8867-8	1 each	178.30	154415	TECHNIQUES IN IMMUNOCYTOCHEMISTRY, Vol. I G.R. Bullock and P. Petrusz, Ed., Academic Press, San Diego, CA, 1982, 306 pages, soft bound. Topics include: Tissue preparation; Unlabelled antibody peroxidase-anti-peroxidase; Protein A - gold; Double immuno-enzymatic labelling; Immunocytochemistry with fixed, unembedded tissue; and more. ISBN 0-12-140404-8	1 each	68.00
194403	SUPERANTIGENS: A Pathogen's View of the Immune System Huber, B.T and Palmer, E. (Eds.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1993, 182 pages, soft bound. This book provides a current examination into superantigens and their function, virology, significance, biochemistry, and structure.	1 each	60.65
