

## Books

194412	<b>STEDMAN'S MEDICAL DICTIONARY, 26th Edition</b> Williams and Wilkins, Baltimore, MD, 1995, 2,225 pages. A full color, illustrated dictionary featuring 12,000 new terms. Each of the sections have been modernized and made easier to use. ISBN 0-683-07922-0	1 each	49.55	159341	<b>SYNTHETIC PEPTIDES: A User's Guide</b> Gregory A. Grant (Ed.), W. H. Freeman and Co., New York, NY, 1992, 382 pages, soft bound. A resource book for those involved in designing, manufacturing, and handling synthetic peptides. ISBN 0-7167-7009-1	1 each	52.10
198633	<b>STRATEGIES FOR PROTEIN PURIFICATION AND CHARACTERIZATION: A Laboratory Course Manual</b> marshak, D.R., et.al., Cold Spring Harbor Laboratory Press, Cold Spring Harbor, NY, 1996, 396 pages, comb bound. This text details how to perform the major protein techniques by applying them to four different types of molecules. They include a regulatory protein, a DNA-binding protein, a membrane-bound receptor and a recombinant protein. Bulk fractionation, chromatographic and electrophoretic techniques are included. ISBN 0-87969-385-1	1 each	89.25	194402	<b>TECHNIQUES IN FREE RADICAL RESEARCH: Laboratory Techniques in Biochemistry and Molecular Biology</b> Rice-Evans, C.A., Diplock, A.T. and Symons, M.C.R. (Eds.), Elsevier Science Publishers, Amsterdam, The Netherlands, 1991, 291 pages, soft bound. This book discusses the topic of ESR and the direct detection of radicals and the involvement of spin-trapping agents. It presents the most relevant, appropriate, and error-less methods and techniques currently available. ISBN 0-444-81314-4	1 each	53.75
159295	<b>STRUCTURE OF ANTIGENS, Vol. I</b> M.H.V. Van Regenmortel (Ed.), CRC Press, Boca Raton, FL, 1992, 415 pages. A useful reference on the structure of antigens and their interactions with antibodies. ISBN 0-8493-8865-1	1 each	178.30	158543	<b>TECHNIQUES IN HIV RESEARCH</b> Anna Aldovini and Bruce Walker, Editors, Oxford University Press, 1990, 288 pages, spiral bound.  <i>"Should be handy to almost anyone working on HIV. The techniques and methods are clearly presented....this book will certainly join the series of some laboratory manual classics."</i> -CELL ISBN 0-935859-88-8	1 each	66.25
159296	<b>STRUCTURE OF ANTIGENS, Vol. II</b> M.H.V. Van Regenmortel (Ed.), CRC Press, Boca Raton, FL, 1992, 336 pages. A useful reference on the structure of antigens and their interactions with antibodies. ISBN 0-8493-8867-8	1 each	178.30	154415	<b>TECHNIQUES IN IMMUNOCYTOCHEMISTRY, Vol. I</b> G.R. Bullock and P. Petrusz, Ed., Academic Press, San Diego, CA, 1982, 306 pages, soft bound. Topics include: Tissue preparation; Unlabelled antibody peroxidase-anti-peroxidase; Protein A - gold; Double immuno-enzymatic labelling; Immunocytochemistry with fixed, unembedded tissue; and more. ISBN 0-12-140404-8	1 each	68.00
194403	<b>SUPERANTIGENS: A Pathogen's View of the Immune System</b> Huber, B.T and Palmer, E. (Eds.), Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 1993, 182 pages, soft bound. This book provides a current examination into superantigens and their function, virology, significance, biochemistry, and structure.	1 each	60.65				

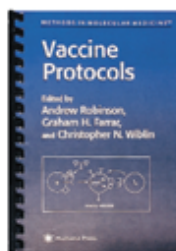

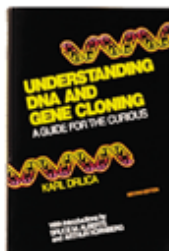

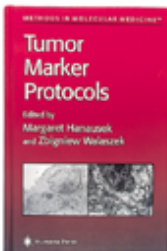

## Books

154416	<p><b>TECHNIQUES IN IMMUNOCYTOCHEMISTRY, Vol. II</b> G.R. Bullock and P. Petrusz, Ed., Academic Press, San Diego, CA, 1983, 290 pages, soft bound. Topics include : Immunogold staining; Localization of steroid hormones and their receptors; Lectin binding to paraffin sections; Immunological methods in scanning electron microscopy; and more. ISBN 0-12-140405-6</p>	1 each	68.00	194281	<p><b>TECHNIQUES IN PROTEIN MODIFICATION</b> Lundblad, R.L. (Ed.), CRC Press, Boca Raton, FL, 1994, 280 pages, hard bound. This book describes, in encyclopedia-like format, chemical methods for site-specific protein modification and modified protein characterization. Featured in the appendix are commonly used reagents, suppliers, and information on general assay methods. ISBN 0-8493-2606-0</p>	1 each	65.95
154417	<p><b>TECHNIQUES IN IMMUNOCYTOCHEMISTRY, Vol. III</b> G.R. Bullock and P. Petrusz, Ed., Academic Press, San Diego, CA, 1985, 241 pages, soft bound. Topics include: Fixation parameters; APAAP Immuno-AP method for monoclonal antibody labeling; Microinjection and immunofluorescence microscopy; And more. ISBN 0-12-140406-4</p>	1 each	68.00	198635	<p><b>TELOMERES</b> Blackburn, E.H. and Greider, C.W.(Eds.), Cold Spring Harbor Laboratory Press, Cold Spring Harbor, NY, 1995, 356 pages, hard bound. This comprehensive text presents telomere structure and function in several organisms including ciliates, Drosophila, yeast, plants and mammals. Telomere dynamics, localization, transcriptional silencing and the significance of length regulation are discussed. ISBN 0-87969-457-2</p>	1 each	84.00
198634	<p><b>TECHNIQUES IN IMMUNOCYTOCHEMISTRY, VOLUME IV</b> Bullock, G.R. and Petrusz, P.(Eds.), Academic Press, San Diego, CA, 1989, 283 pages, hard bound. Topics include: Cryofixation, low temperature embedding, detecting cytoskeletal proteins, microbiological immunocytochemistry, immunocytochemistry of blood and bone marrow cells, detection of mRNA, ultrastructural identification of mRNA in myotubes, silver intensification and excitatory amino acids in the brain. ISBN 0-12140-407-2</p>	1 each	103.95	198730	<p><b>THEORY AND PRACTICE OF HISTOLOGICAL TECHNIQUES, 4th Edition</b> Bancroft, J.D. and Stevens, A.(Eds.), Churchill Livingstone, Edinburgh, Scotland, 1996, 800 pages, hard bound. This volume discusses traditional techniques, but focuses on the advances in histotechnology techniques, especially for the analysis of difficult cases.</p>	1 each	134.50
159225	<p><b>TECHNIQUES IN PROTEIN CHEMISTRY IV</b> Ruth Hogue Angeletti, et al.(Eds.), Academic Press, San Diego, CA, 1993, 640 pages, comb bound. This book features the most up-to-date advances in protein methodologies and will be a valuable bench-top reference. ISBN 0-12-058758-0</p>	1 each	69.40	194242	<p><b>TIETZ TEXTBOOK OF CLINICAL CHEMISTRY, 2nd Edition</b> Burtis, C.A. and Ashwood, E.R. (Eds.), W.B. Saunders, Philadelphia, PA, 1994, 2,217 pages, hard bound. This edition has been re-structured into sections featuring laboratory principles, analytic techniques and instrumentation, chemometrics, laboratory management analytes and pathophysiology. Presented in this text is more than 100 illustrations emphasizing key information at a glance. ISBN 0-7216-4472-4</p>	1 each	168.00

## Books

194241	<p><b>TISSUE CULTURE TECHNIQUES: An Introduction</b>            Martin, B.M., Birkhauser Boston, MA, 1994, 250 pages, soft bound.            This book features extensive illustrations, an informal style, and numerous troubleshooting tips and problem sets. It is designed as a manual of tissue culture techniques as a first course for undergraduates and experienced individuals needed a brief refresher course.            ISBN 0-8176-3643-9</p>	1 each	47.25	198636	<p><b>TRANSLATIONAL CONTROL</b>            Hershey, J.W.B., Mathews, M.B. and Sonenberg, N., Cold Spring Harbor Laboratory Press, Cold Spring Harbor, NY, 1995, 650 pages, soft bound.            This text is a comprehensive review of translation, the complexity of its regulation and its effects on protein synthesis and gene expression.            ISBN 0-87969-526-9</p>	1 each	73.50
159322	<p><b>TRANSCRIPTION FACTORS: A Practical Approach</b>            David S. Latchman (Ed.), Oxford University Press, Oxford, UK, 1993, 224 pages, soft bound.            This book provides a comprehensive description of all the approaches and methods required to identify, isolate, and characterize transcription factors.            ISBN 0-19-963341-X</p>	1 each	45.15	198637	<p><b>TWO-COMPONENT SIGNAL TRANSDUCTION</b>            Hoch, J.A. and Silhavy, T.J., American Society for Microbiology, Washington, DC, 1995, 504 pages, hard bound.            This book presents signal transduction and its implications in the control of the gene expression, pathogenesis and antibiotic resistance.            ISBN 1-55581-089-6</p>	1 each	82.95
159226	<p><b>TRANSGENESIS AND TARGETED MUTAGENESIS IN IMMUNOLOGY</b>            Horst Bluethmann (Ed.), Academic Press, San Diego, CA, 1994, --326 pages.            This break-through laboratory guide provides a complete study of transgenesis and targeted mutagenesis in laboratory mice.            ISBN 0-12-105760-7</p>	1 each	68.30	154429	<p><b>UNDERSTANDING DNA AND GENE CLONING: A Guide for the Curious, 2nd Ed.</b>            K. Drica, John Wiley &amp; Sons, New York, NY, 1984, 240 pages, soft bound.            This book will serve as background reading for scientists of other disciplines to become familiar with the field of DNA and gene cloning.            ISBN 0-471-62225-7</p>	1 each	36.95
198854	<p><b>TRANSMEMBRANE SIGNALING PROTOCOLS</b>            Bar-Sagi, Dafna (Ed.), Humana Press, Totowa, NJ, 1998, 320 pages, hard bound.            An authoritative collection of multidisciplinary methods that produced landmark discoveries in transmembrane signaling and remain widely used to investigate the molecular and cellular aspects of signal transduction. The collection includes novel methodologies to assay signaling mechanisms and to investigate regulatory events that occur not only at the cell membrane, but also in the cytoplasm and the nucleus.            ISBN 0-89603-488-7</p>	1 each	104.45	198638	<p><b>VACCINE PROTOCOLS</b>            Robinson, A., Farrar, G.H., Wibiin, C.N. (Eds.) Humana Press, Totowa, NJ, 1996, 352 pages, comb bound.            This book covers the development of vaccines from molecular biology techniques to clinical trials and regulatory requirements. Topics include: live viral and bacterial vectors, recombinant viral antigens, use of adjuvants, and assessing immunogenicity.            ISBN 0-89603-314-1</p>	1 each	93.45

## Books

194233	<b>VECTORS: Essential Data Series</b> Gaceta, P. and Ramji, D.P. (Eds.), John Wiley and Sons, New York, NY, 1994, 166 pages, soft bound. A comprehensive publication covering information on more than 230 commercially available vectors for bacterial, mammalian, plant and yeast research.	1 each	22.00
194231	<b>VISUALIZATION OF NUCLEIC ACIDS</b> Morel, G. (Ed.), CRC Press, Boca Raton, FL, 1995, 400 pages. This book offers visualization of isolated nucleic acids using scanning probe and transmission electronmicroscopes, gene mapping and localizing methods for studying deletion and translocation, and potential applications in pathology, with particular attention to viral nucleic acids and in situ PCR.	1 each	137.80
159298	<b>VIRAL FUSION MECHANISMS</b> Joe Bentz, CRC Press, Boca Raton, FL, 1992, 544 pages, hard bound. Viral Fusion Mechanisms presents the first comprehensive review on this exciting topic. ISBN 0-8493-5606-7	1 each	266.20
159236	<b>VIROLOGY: A Laboratory Manual</b> Florence G. Burleson, Thomas M. Chambers, and Danny L. Wiedbrank (Eds.), Academic Press, San Diego, CA, 1992, 250 pages, soft bound. This classroom text details the key points of virology. ISBN 0-12-144730-8	1 each	44.50
158436	<b>VIRUSES THAT AFFECT THE IMMUNE SYSTEM</b> Hung Y. Fan, Irvin S.Y. Chen, Naomi Rosenberg, and William Sugden, Editors, ASM Press, Washington D.C., 1991, 249 pages, hard bound. This volume presents material from the 1990 ICN-UCI International Conference on Virology, "Viruses That Affect the Immune System," . Topics include autoimmunity, immunodeficiency by retroviruses, oncogenesis by retroviruses, and more. ISBN 1-55581-032-2	1 each	71.15
198639	<b>YAC PROTOCOLS</b> Markie, D. (Ed.) Humana Press, Totowa, NJ, 1996, 378 pages, comb bound. This text offers how-to protocols for all aspects of yeast artificial chromosomes. Topics range from construction of YAC libraries and their storage, database management to the use of YACS for being transferred into mammalian cells. ISBN 0-89603-313-9	1 each	72.95
198640	<b>YEAST PROTOCOLS: Methods in Cell and Molecular Biology</b> Evans, I.H. (Ed.), Humana Press, Totowa, NJ, 1996, 433 pages, comb bound. This text focuses on saccharomyces cerevisiae to explain how to isolate, identify and culture yeasts; how to use PFGE in karyotyping and gene localization; meiotic mapping; genomic DNA clone banks. Chromosome engineering, insertion mutagenesis, reporter gene systems and genotoxicity testing are also discussed. ISBN 0-89603-319-8	1 each	95.40
